Traditions of asceticism, yoga, and devotion (bhakti), including dance and music, developed in Hinduism over long periods of time. Some of these practices, notably those denoted by the term yoga, are orientated towards salvation from the cycle of reincarnation and go back several thousand years. These practices, borne witness to in ancient texts called Upaniṣads, as well as in other traditions, notably early Buddhism and Jainism, are the subject of this volume in the Oxford History of Hinduism. Practices of meditation are also linked to asceticism (tapas) and its institutional articulation in renunciation (samnyāsa). There is a range of practices or disciplines from ascetic fasting to taking a vow (vrata) for a deity in return for a favour. There are also devotional practices that might involve ritual, making an offering to a deity and receiving a blessing, dancing, or visualization of the master (guru). The overall theme—the history of religious practices—might even be seen as being within a broader intellectual trajectory of cultural history. In the substantial introduction by the editor this broad history is sketched, paying particular attention to what we

might call the medieval period (post-Gupta) through to modernity when traditions had significantly developed in relation to each other. The chapters in the book chart the history of Hindu practice, paying particular attention to indigenous terms and recognizing indigenous distinctions such as between the ritual life of the householder and the renouncer seeking liberation, between 'inner' practices of and 'external' practices of ritual, and between those desirous of liberation (mumukṣu) and those desirous of pleasure and worldly success (bubhuṁkṣu). This whole range of meditative and devotional practices that have developed in the history of Hinduism are represented in this book. A comprehensive and theory-rich investigation of the history and philosophy of yoga, from its Indian origins to the contemporary context. Clear, accessible, and meticulously annotated, *Tracing the Path of Yoga* offers a comprehensive survey of the history and philosophy of yoga that will be invaluable to both specialists and to nonspecialists seeking a deeper understanding of this fascinating subject. Stuart Ray Sarbacker argues that yoga can be understood first and foremost as a discipline of mind and body that is represented in its narrative and philosophical literature as resulting in both numinous and cessative accomplishments that correspond, respectively, to the attainment of this-worldly power and otherworldly liberation. Sarbacker demonstrates how the yogic quest for perfection as such is situated within the concrete realities of human life, intersecting with issues of politics, economics, class, gender, and sexuality, as well as reflecting larger Indic religious and philosophical ideals. Stuart Ray Sarbacker is Associate Professor of Philosophy and Religion at Oregon State University. He is the author of *Samādhi: The Numinous and Cessative in Indo-Tibetan Yoga*, also published by SUNY Press, and (with Kevin Kimple) *The Eight Limbs of Yoga: A Handbook for Living Yoga Philosophy*. The Asia-Pacific has become the Indo-Pacific region as the US, Japan, Australia and India have decided to join forces and scale-up their political, economic and security

cooperation. The message coming from Washington, Tokyo, Canberra and New Delhi is clear: China's Belt and Road Initiative (BRI) is no longer the only game in town and Beijing's policymakers better get ready for fierce competition. Japan's ongoing and future "quality infrastructure" policies and investments in the Indo-Pacific in particular make it very clear that Tokyo wants a (much) bigger slice of the pie of infrastructure investments in the region. China's territorial expansionism in the South China Sea and its increasing interests and presence in countries in South Asia have done their share to help the four aforesaid countries expand their security and defence ties. Beijing, of course, smells containment in all of this and it probably has a point. Who will have the upper hand in shaping and defining Asian security and providing developing South and Southeast Asia with badly-needed infrastructure: the US and Japan together with its allies or the increasingly assertive and uncompromising China and its Belt and Road Initiative? Led by Prime Minister Narendra Modi, the BJP administration has established an ethno-religious and populist style of rule since 2014. Its agenda is also pursued beyond the formal branches of government, as the new dispensation portrays conventional social hierarchies as intrinsic to Indian culture while condoning communal and caste- and gender-based violence. The contributors explore how Hindutva ideology has permeated the state apparatus and formal institutions, and how Hindutva activists exert control over civil society via vigilante groups, cultural policing and violence. Groups and regions portrayed as 'enemies' of the

Indian state are the losers in a new order promoting the interests of the urban middle class and business elites. As this majoritarian ideology pervades the media and public discourse, it also affects the judiciary, universities and cultural institutions, increasingly captured by Hindu nationalists. Dissent and difference silenced and debate increasingly sidelined as the press is muzzled or intimidated in the courts. Internationally, the BJP government has emphasised hard power and a fast-expanding security state. The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready

to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!. Can humans flourish without destroying the earth? In this book, experts on many of the world's major and minor religious traditions address the question of human and earth flourishing. Each chapter considers specific religious ideas and specific environmental harms. Chapters are paired and the authors work in dialogue with one another. Taken together, the chapters reveal that the question of flourishing is deceptively simple. Most would agree that humans should flourish without destroying the earth. But

not all humans have equal opportunities to flourish. Additionally, on a basic physical level any human flourishing must, of necessity, cause some harm. These considerations of the price and distribution of flourishing raise unique questions about the status of humans and nature. This book represents a step toward reconciliation: that people and their ecosystems may live in peace, that people from different religious worldviews may engage in productive dialogue; in short, that all may flourish.

Is it simply food to consume, or a metaphor for our own bodies? Can “bloody” vegan burgers, petri dish beef, live animals, or human milk be categorized as meat? In pursuing these questions, the contributors to Meat! trace the shifting boundaries of the meanings of meat across time, geography, and cultures. In studies of

chicken, fish, milk, barbecue, fake meat, animal sacrifice, cannibalism, exotic meat, frozen meat, and other manifestations of meat, they highlight meat's entanglements with race, gender, sexuality, and disability. From the imperial politics embedded in labeling canned white tuna as “the chicken of the sea” to the relationship between beef bans, yoga, and bodily purity in Hindu nationalist politics, the contributors demonstrate how meat is an ideal vantage point from which to better understand transnational circuits of power and ideology as well as the histories of colonialism, ableism, and sexism. Contributors Neel Ahuja, Irina Aristarkhova, Sushmita Chatterjee, Mel Y. Chen, Kim Q. Hall, Jennifer A. Hamilton, Anita Mannur, Elspeth Probyn, Parama Roy, Banu Subramaniam, Angela Willey, Psyche Williams-Forson

LIMCA BOOK OF RECORDS 2018. READ...AND LEAD! Pop Culture Yoga: A Communication Remix was born out of a series of questions about the paradoxical nature of yoga: How do individuals and groups define yoga? What does it mean to "practice yoga", and what does this practice involve? What are some of the most important principles, guidelines, or philosophical tenets of yoga that shape people's definitions and practices? Who has the power and authority to define yoga? What are the limits, if any, of shared definitions of yoga? Kristen C. Blinne explores the myriad ways "yoga" is communicatively constructed and defined in and through popular culture in the United States. In doing so, Blinne offers insight into the many identity work processes in play in the construction of yoga categories, illuminating how individuals' and groups' words and actions represent practices of claiming--part of a complex communicative process centered around membership categorization--based on a range of authenticity discourses. Employing popular culture writing styles, Blinne ultimately contends that the majority of yoga styles practiced in the United States are remixes that can be classified as pop culture yoga, a distinct way of understanding this complex phenomenon. Typically, scholars approach migrants' religions as a safeguard of cultural identity, something that connects migrants to their communities of origin. This ethnographic anthology challenges that position by reframing the religious experiences of migrants as a transformative force capable of refashioning narratives of displacement into journeys of spiritual awakening and missionary calling. These essays explore migrants' motivations in support of an argument that to travel inspires a search for new meaning in religion. This book develops the concept of Asian Medical Industries as a novel perspective on traditional Asian medicines. Complementing and updating existing work in this field, the book provides a critical and comparative analytic framework for understanding Chinese Medicine, Ayurveda, Sowa Rigpa, and Japanese Kampo in the 21st century. No longer subaltern health resources or conservative systems of traditional knowledge, these medicines have become an integral part of modern Asia as innovative, lucrative industries. Ten original case studies employ insights from anthropology, history, geography, pharmaceutical sciences, botany, and economics to trace the transformation of Asian medical traditions into rapidly growing and dynamic pharmaceutical industries. Collectively, these contributions identify this as a major phenomenon impacting Asian and global healthcare, economics, cultural politics, and environments. The book suggests that we can learn more about Asian medicines today by approaching them as industries rather than as cultural or epistemic systems. Asian Medical Industries is a highly original resource for students and scholars across a range of academic fields such as anthropology, history, and Asian studies, as well as medical practitioners, health sector actors, and policymakers. Yoga is a popular and beneficial evidence-based health practice. This book addresses the origins, explores yoga's evolution, and outlines current scientific research as well as contemporary discussions related to the possibilities as well as the politicization of this ancient Indian practice. It presents the main Hindu communities, religious groups, forms and teachings present in the continent and shows that Hinduism have become a major religion in Europe. "In Peace Love Yoga, Jain analyses growing spiritual industries and their coherence with neoliberal capitalism. "Personal growth," "self-care," and "transformation" are just some of the generative tropes in the narrative of these industries. Jain illuminates the power

dynamics underlying what she calls neoliberal spirituality, illustrating how spiritual commodities are rooted in concerns about deviancy, not only in the form of low productivity but also forms of social deviancy. Jain, however, does not just offer one more voice bemoaning the commodification of spirituality as a numbing device through which consumers ignore the problems of neoliberal capitalism or as the corruption or loss of "authentic" religious forms. Instead, she asks what we should make of subversive spiritual discourses that call on adherents to think beyond the individual and even out into the environment, claims to counter the problems of unbridled capitalism with charitable giving or "conscious capitalism," challenges to the imperialism behind the appropriation and commodification of products from yoga to mindfulness, calls for women's empowerment, and efforts to greenwash commodities, making them more environmentally "friendly" or "sustainable." Rather than a mode through which consumers ignore, escape, or are numbed to the problems of neoliberal capitalism, many spiritual commodities, corporations, and entrepreneurs, Jain suggests, do actually acknowledge those problems and, in fact, subvert them; but they subvert them through mere gestures. From provocative taglines printed across t-shirts or packaging to calls for "conscious capitalism," commodification serves as a strategy through which subversion itself is contained"-- Traditions of asceticism, yoga, and devotion (bhakti), including dance and music, developed in Hinduism over long periods of time. Some of these practices, notably those denoted by the term yoga, are orientated towards salvation from the cycle of reincarnation and go back several thousand years. These practices, borne witness to in ancient texts called Upaniṣads, as well as in other traditions, notably early Buddhism and Jainism, are the subject of this volume in the Oxford History of Hinduism. Practices of meditation are also linked to asceticism (tapas) and its institutional articulation in renunciation (saṁnyāsa). There is a range of practices or disciplines from ascetic

fasting to taking a vow (vrata) for a deity in return for a favour. There are also devotional practices that might involve ritual, making an offering to a deity and receiving a blessing, dancing, or visualization of the master (guru). The overall theme--the history of religious practices--might even be seen as being within a broader intellectual trajectory of cultural history. In the substantial introduction by the editor this broad history is sketched, paying particular attention to what we might call the medieval period (post-Gupta) through to modernity when traditions had significantly developed in relation to each other. The chapters in the book chart the history of Hindu practice, paying particular attention to indigenous terms and recognizing indigenous distinctions such as between the ritual life of the householder and the renouncer seeking liberation, between 'inner' practices of and 'external' practices of ritual, and between those desirous of liberation (mumukṣu) and those desirous of pleasure and worldly success (bubhukṣu). This whole range of meditative and devotional practices that have developed in the history of Hinduism are represented in this book. Populism has lately experienced a meteoric rise to become one of the most widely used terms in academic and wider public discourses and a supposedly defining feature of both domestic and world politics. Situated at the intersection of International Relations (IR), Political Theory and Comparative Politics, this book makes a critical intervention into the burgeoning IR scholarship on populism and problematizes the often hyperbolic and sweeping usage of the term as a general descriptor for non-centrist politics of different persuasions. The book seeks to move into a different theoretical direction and broaden the empirical focus of existing IR research. Theoretically, it bridges the gap between theories of populism and IR by bringing the Laclauian, discursive approach and IR poststructuralism together in a theoretical framework. The proposed framework moves away from the search for the policy preferences and impact of populism, and instead conceptualizes foreign

policy and world politics as potential sites for practicing populism, ranging from the articulation of societal grievances to the construction of populist identities such as 'the people'. Empirically, the book takes IR scholarship beyond the predominant focus on the populist radical right and single-country and -region studies. Building on the discourse analysis of an original data set, it offers a comparative analysis of right-wing and left-wing populist discourses in different world regions as well as populist cross-border collaboration and identity construction. This book provides a science diplomacy outlook as a new governance tool in international cooperation. It elaborates on India's current S&T collaboration with Afghanistan, Bangladesh, Bhutan, Maldives, Myanmar, Nepal, Pakistan, Sri Lanka, and science policy and science diplomacy in India. The book introduces concepts and contours of science diplomacy with international examples. It presents insights into international governance models, mega-science projects, and science diplomacy's role in addressing global climate change and sustainable development challenges. The book is a valuable reference to spark breakthroughs in India's science diplomacy with its neighbouring countries for scientists, diplomats, policymakers, government, and non-government institutions interested in science and diplomacy.
