Savannah Harbor Expansion Project Chatman County, Georgia and Jasper County, South Carolina Jan 19 2020

Commercial Shipping Handbook Aug 06 2021 The Commercial Shipping Handbook is an invaluable reference tool for anyone involved in international trade and a first step towards understanding the framework within which the international movement of goods by sea is conducted. The handbook gives concise explanations of the many activities that comprise shipping, explaining the terms and how they interrelate. Areas covered include: Documents used in international transport by sea e.g. the bill of lading and the charter-party - what they contain, the different types and examples of each Generic types of ships, cargoes, containers and ports Details of all the major maritime associations prominent in contract drafting and policy making, together with a brief explanation of their objectives The many extra costs and surcharges found in shipping, particularly in liner shipping Chartering terms, an explanation of each and their context Clauses appearing in bills of lading, in voyage charters and time charters Technical elements of shipping as they relate to the commercial operation of ships, for example tides and draughts Examples of principal documents Discussing over 1250 commercial shipping terms, this book will be an essential reference for all shipowners, charterers, managers and brokers and will also be of use to legal, insurance and banking professionals.

Research Handbook on Shareholder Power Mar 21 2020 Much of the history of corporate law has concerned itself not with shareholder power, but rather with its absence. Recent shifts in capital market structure require a reassessment of the role and power of shareholders. These original, specially commiss

Saving the Oceans Through Law Oct 08 2021 The oceans cover more than seventy per cent of the surface of the planet and they provide many vital ecosystem services. However, the health of the world's oceans has been deteriorating over the past decades and the protection of the marine environment has emerged as one of the most pressing legal and political challenges for the international community. An effective solution depends upon the cooperation of all states towards achieving agreed objectives.

This book provides a critical assessment of the role that international law plays in this process, by explaining and evaluating the various legal instruments that have been negotiated in this area, as well as key trends in global ocean governance. Starting with a detailed analysis of the United Nations Convention on the Law of the Sea, the book considers the main treaties and other legal texts that seeks to prevent, reduce, and control damage to the marine environment caused by navigation, seabed exploitation, fishing, dumping, and land-based activities, as well as emerging pressures such as ocean noise and climate change. The book demonstrates how international institutions have expanded their mandates to address a broader range of marine environmental issues, beyond basic problems of pollution control to include the conservation of marine biological diversity and an ecosystems approach to regulation. It also discusses the development of diverse regulatory tools to address anthropogenic impacts on the marine environment and the extent to which states have adopted a precautionary approach in different maritime sectors. Whilst many advances have been made in these matters, this book highlights the need for greater coordination between international institutions, as well as the

desirability of developing stronger enforcement mechanisms for international environmental rules.

Propaganda 2.1 Jun 16 2022 Since the US presidential election of 2016 the words propaganda and fake news have been prominent in American political and cultural discourse. Yet very few people can provide a coherent explanation of what they mean, precisely, when using them. On the two sides of the political spectrum (“red” and “blue”), each points out messages from the other side that they think are untrue—or that they simply don’t like. Unlike our dangerously biased political system, however, reality has more than only two sides. For decades, Americans sat by while their mediated world was carved into a single “red reality” focused in necessary opposition to a single “blue reality.” We’ve been given “red media outlets” and “blue media outlets” to stoke our collective rage, each against the other’s lies. But the first two decades of the twenty-first century have presented us with a new information environment, one of unregulated and seemingly uncontrollable information. Like the young boy in a popular folktale, we can now see—if only we can resist the pressures of social conformity—that both emperors, red and blue, strut proudly before us, naked. *Propaganda 2.1* is a handbook for seeing reality clearly—and coping with it.

Tragedy at Dieppe Mar 01 2021 Now in paper! The gripping story of the Canadian Army's disastrous raid on Dieppe -- the tenth instalment of the bestselling Canadian Battle Series. Nicknamed "the Poor Man's Monte Carlo," Dieppe had no strategic importance in World War II -- but the decision to assault it in August 1942 with the largest raid mounted to that date was political. With the Soviet Union thrown on the ropes by German invasion and America having just entered the war, Britain was under intense pressure to launch a major cross-Channel attack. In Canada, too, the public was calling for action, impatient to see Canadian soldiers wrap up their training in Britain and get into the war. Almost 5,000 Canadians formed the core of a 6,000-

strong force. By the raid's end, 913 would be dead or mortally wounded, 1,946 would be prisoners of war and the Dieppe raid would become Canada's most costly day of World War II. Drawing on rare archival documents and personal interviews, Mark Zuehlke examines how the raid came to be and why it went so tragically wrong. From the clashes of personality and ambition among those masterminding the raid to the experiences of the common soldier left to carry it out, this tenth instalment of the Canadian Battle Series tells a compelling, unflinching story.

Digital Transformation and Its Role in Progressing the Relationship Between States and Their Citizens Jan 31 2021

Countries at different points of development are affected differently by shifts in the ability to access information. These changes require the action of governments to cope in order to preserve accountability and information access. The progression of these changes could vary between countries based on the level of development. *Digital Transformation and Its Role in Progressing the Relationship Between States and Their Citizens* is a cutting-edge research publication that examines the relationship between government and citizens especially regarding accountability, communication, and access to information. Featuring a wide range of topics such as electoral reform, free speech, and citizen empowerment, this book is ideal for policymakers, researchers, legal professionals, activists, government employees, and academicians.

The Wreck of Catalonia: Civil War in the Fifteenth Century Feb 12

2022 This fascinating account examines the fate which overtook the principality of Catalonia in the fifteenth century, reducing it from dominance within the state of Aragon to a marginal role in the Iberian power created by the union of Aragon and Castile. It begins by studying the tensions destabilising Catalonia: unrest among a peasantry resentful of outdated burdens; merchants and artisans struggling to wrest control of the towns from entrenched oligarchies; an aristocracy devoted to endless feuding; and a

monarchy thrown into disarray by the extinction of the Catalan line and its replacement by a Castilian dynasty. In 1462 , Catalonia degenerated into a civil war which lasted ten years. Part two seeks to explain how and why the king, Juan II, emerged victorious. The economic and military resources of the two camps, their tactics, and the lines along which Catalan society divided are examined. Alan Ryder look at the crucial part played by foreign powers in the conflict, who intervened on both sides until Juan turned the tables with his gamble on a Castilian crown for his heir, Fernando. The surrender of the insurgents in 1472 left Catalonia chaotic, devastated, and mired in many more years of war with France as Juan struggled to recover the territories he had rashly surrendered in return for French aid. Catalonia thus lay helpless before the might of Fernando, the Catholic King of Castile, when he became its ruler in 1479. The measures he imposed to restore order and subject the principality to the new 'Spanish' state are the theme of the final chapter.

Interpreting Maritime History at Museums and Historic Sites Feb 18 2020 *Interpreting Maritime History at Museums and Historic Sites* lays the groundwork for keeping this heritage alive in museums and historic sites. It provides the broadest spectrum of discussion and direction for those approaching new installations, projects and programming. Highlights of its wide-range include:

- Historic vessels and shipbuilding
- Freshwater maritime history, including a focus on regionalism
- Maritime archaeology, including shipwrecks
- Scientific history, including the environment
- Recreational history, including rowing, fishing, racing, and cruising
- Lighthouses and lifesaving stations

The Law of Wreck Jan 23 2023 This book covers wreck law as an integrated whole, going beyond the question of "removal" to include issues such as the ownership of wreck and how the law deals with the many commercial law problems arising after ships have been wrecked during the maritime commercial adventure. The book offers authoritative guidance on the genesis and

meaning of the Nairobi Wreck Removal Convention 2007, and the interpretation of its often-complex provisions as they apply both to States trying to use its powers and to shipowners and liability insurers faced by its obligations. The authors explain the increasingly complex inter-relationship between linked areas of maritime law, including salvage, intervention and the overlapping international regimes which deal with pollution from oil, bunkers or hazardous and noxious substances. The book examines how a salvage operation transitions to wreck removal and links the liability provisions with the standard form international commercial contracts actually used by the industry to remove wrecks, eg BIMCO's Wreckstage 2010, Wreckhire 2010 and Wreckfixed 2010. It also covers the complex requirements concerning the disposal of wrecks, including the latest recycling regulations applicable in 2019. The Law of Wreck will be of value to shipping industry professionals, insurers and legal practitioners, as well as academics and students of maritime law. Texas Advance Sheet March 2012 Nov 21 2022

Wreck Bay Dec 30 2020 Prehistory of Wreck Bay area; early contacts; details of early residents, development of fishing industry; administrative status of the settlement; land claim.

Treaties in Force 2012: A List of Treaties and Other International Agreements of the United States in Force on January 1, 2012: A List of Treaties and Oct 20 2022 Lists treaties and other international agreements of the United States on record in the Department of State on January 1, 2012 which had not expired by their terms or which had not been denounced by the parties, replaced or superseded by other agreements, or otherwise definitely terminated. Published annually.

The Cattewater Wreck Nov 28 2020

Communication Technology Update and Fundamentals Jun 23 2020 Communication technologies surround us in every part of our lives: via television, web, blogging, mass media, and much more. How do people in business keep up with the latest and

greatest trends, and how do they differentiate good information from bad information? How do they get help analyzing information and coming to conclusions about trends that will impact their businesses and business decisions? How do they consider the environmental and sustainability issues surrounding communication technology? This book answers these essential questions. It's for professionals and students working in telecommunications, including electronic mass media, digital signage, computers, consumer electronics, games, satellites, and telepresence. The best of the best minds on these topics all come forward here, each in their own chapter, to report on, analyze, and make recommendations, for the new edition of this definitive guide to new technologies. New to this edition: • New coverage of historical perspectives on communication technology bring the ideas and concepts to the forefront, providing a thoroughly grounded approach designed to appeal to professors looking for more the why's than the how's of comm. tech • New chapters on digital cinema, mobile commerce, digital television, cinema technologies, e-books, home video, digital audio, and telepresence. • As always, every chapter is updated to reflect the latest trends on the topic • Brand new! Instructor's manual with testbank and sample syllabus • Website - brand new for this edition. Chapter-by-chapter additional coverage of technologies and further resources. Continually updated. * Gives students and professionals THE latest information in all areas of communication technologies * The companion website offers updated information to this text, plus links to related industry resources * New focus on mobile commerce, digital television, cinema technologies, digital audio, ebooks, and much more

Marine Navigation and Safety of Sea Transportation Apr 21 2020 The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many

aspects of the navigational safety from various different points of view. Topics present

Security, Governance, and State Fragility in South Africa

Jun 04 2021 Do existing measures of state fragility measure fragility accurately? Based on commonly used fragility measures, South Africa (SA) is classified as a relatively stable state, yet rising violent crime, high unemployment, endemic poverty, eroding public trust, identity group based preferential treatment policies, and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility. Based on a comprehensive view of security, this study examines the extent to which measures of political legitimacy and good governance, effectiveness in the security system - especially with respect to the police system - and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility. Using a mixed-methods approach based on quantitative secondary data analysis and semi-structured interviews with government officials, security practitioners, and leading experts in the field, this study finds that the combination of colonization, apartheid, liberation struggle, transition from autocracy to democracy, high levels of direct and structural violence, stagnating social, political, and economic developments make South Africa a latently fragile state. Conceptually, the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility. Practically, this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility.

[Review of the FY 2012 Budget and Priorities of the Army Corps of Engineers, Tennessee Valley Authority, and the Natural Resources Conservation Service](#) Feb 24 2023

Citizen E-Participation in Urban Governance:

Crowdsourcing and Collaborative Creativity Mar 13 2022 The

relationship between citizens and city governments is gradually transforming due to the utilization of advanced information and communication technologies in order to inform, consult, and engage citizens. **Citizen E-Participation in Urban Governance: Crowdsourcing and Collaborative Creativity** explores the nature of the new challenges confronting citizens and local governments in the field of urban governance. This comprehensive reference source explores the role that Web 2.0 technologies play in promoting citizen participation and empowerment in the city government and is intended for scholars, researchers, students, and practitioners in the field of urban studies, urban planning, political science, public administration, and more.

The Wreck of the Batavia & Prosper Sep 07 2021

Shipping and the Environment May 23 2020 From the time it was first published in 1998, *Shipping and the Environment* has been the leading text on international and US law and practice in this field. Written by renowned legal and insurance practitioners with over 100 years of combined specialist experience, including first-hand knowledge of many major incidents, it is not only a comprehensive reference work but an abundant source of introductory material and practical insights, all explained with a clarity appreciated by lawyers and non-lawyers alike in a broad international readership. While updating its core subjects of pollution from ships, wreck removal and dumping at sea, this enlarged text extends into other modern areas including pollution from offshore operations after Deepwater Horizon, plastics released into the sea, recycling of vessels, polar operations, and the fast-changing restrictions on carbon emissions from ships, as well as safety threats such as cyberattacks, terrorism and modern forms of piracy. With a highly readable introductory chapter amounting to a book within a book, this is a volume of great importance to all whose work or studies are concerned with marine environmental affairs, whether in government, international bodies, industry, technical organizations, the

professions, environmental NGOs, the academic world or other walks of life.

Inside the Equal Access to Justice Act May 15 2022 Next Generation INDIE Book Awards Grand Prize Winner, Best Non-Fiction Book in 2017; and Winner in the Science/Nature/Environment category Finalist for Foreword INDIES Book of the Year Awards in Ecology and Environment In this book, Lowell E. Baier, one of America's preeminent experts on environmental litigation, chronicles the century-long story of America's resources management, focusing on litigations, citizen suit provisions, and attorneys' fees. He provides the first book-length comprehensive examination of the little-known Equal Access to Justice Act (EAJA) and its role in environmental litigation. Originally intended to support veterans, the disabled and small business, EAJA, Baier argues, now paralyzes America's public land management agencies. Baier introduces readers to the history of EAJA, examines the many beneficiaries of the law, describes in depth 20 of the most prominent litigious environmental groups in America, and recommends carefully tailored amendments to the EAJA to correct environmental abuses of the law while protecting legitimate interests. *Inside the Equal Access to Justice Act* will be a valuable resource for the environmental legal community, environmentalists, practitioners at all levels of government, and all readers interested in environmental policy and the rise of the administrative state.

Texas Advance Sheet January 2012 Dec 22 2022

International Law of Underwater Cultural Heritage Sep 26 2020

This book brings together three distinct areas of International Law - namely Environmental, Heritage and Ocean Law - to address the international legal protection of historically significant wrecks, with particular focus on the environmental hazards they may pose. The confluence of Heritage Law and the Law of the Sea with International Environmental Law represents an important development in international governance strategies

for the twenty-first century, in particular those legal and administrative regimes that concern the world's oceans and underwater cultural heritage protection. Importantly, connections between international legal regimes, such as the 1982 Law of the Sea, and institutions like the International Maritime Organisation (IMO) and United Nations Education Scientific Cultural Organisation (UNESCO), can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks.

Shaplin: Three Plays May 03 2021 "Adriano Shaplin is set to join Arthur Miller and David Mamet in the pantheon of great modern American dramatists . . . a playwright destined to leave a lasting impact on 21st century theatre."—Scotland on Sunday This collection includes *Wreck the Airline Barrier*, *Victory at the Dirt Palace*, and *Pugilist Specialist*.

Bayesian Methods in the Search for MH370 Nov 09 2021

This book demonstrates how nonlinear/non-Gaussian Bayesian time series estimation methods were used to produce a probability distribution of potential MH370 flight paths. It provides details of how the probabilistic models of aircraft flight dynamics, satellite communication system measurements, environmental effects and radar data were constructed and calibrated. The probability distribution was used to define the search zone in the southern Indian Ocean. The book describes particle-filter based numerical calculation of the aircraft flight-path probability distribution and validates the method using data from several of the involved aircraft's previous flights. Finally it is shown how the Reunion Island flaperon debris find affects the search probability distribution.

[Reading Underwater Wreckage](#) Jan 11 2022 Presenting a novel and needed theoretical model for interpreting shipwrecks and other drowned fragments-the histories they tell, and the futures they presage-as junctures of artefact and ecofact, human remains and emergent ecologies, this book puts the environmental

humanities, and particularly multispecies studies, in close conversation with literary studies, history, and aesthetic theory. Earth's oceans hold the remains of as many as three million shipwrecks, some thousands of years old. Instead of approaching shipwrecks as either artefacts or “ecofacts,” this book presents a third frame for understanding, one inspired by the material dynamism of sea-floor stuff. As they become encrusted by oceanic matter—some of it living, some inanimate—anthropic fragments participate in a distinctively submarine form of material relation. That relation comprises a wide, and sometimes incalculable, array of things, lives, times, and stories. Drawing from several centuries of literary, philosophical, and scientific encounters with encrustations—as well as from some of the innumerable encrusted “art-forms” that inhabit the sea floor—this book serves anyone in search of better ways to perceive, describe, and imagine submarine matters.

Intimacy Post-injury Apr 14 2022 PTSD (post traumatic stress disorder) and TBI (traumatic brain injury) have been called the 'signature wounds' of the recent war. The bomb blast has been the 'signature weapon' of these conflicts, which primarily affect the lower exposed areas of the body, including the extremities and pelvic region.

Train Wreck Aug 18 2022 Trains are massive—with some weighing 15,000 tons or more. When these metal monsters collide or go off the rails, their destructive power becomes clear. In this book, George Bibel presents riveting tales of trains gone wrong, the detective work of finding out why, and the safety improvements that were born of tragedy. Train Wreck details 17 crashes in which more than 200 people were killed. Readers follow investigators as they sift through the rubble and work with computerized event recorders to figure out what happened. Using a mix of eyewitness accounts and scientific explanations, Bibel draws us into a world of forensics and human drama. Train Wreck is a fascinating exploration of • runaway trains • bearing failures •

metal fatigue • crash testing • collision dynamics • bad rails

The Allied Defense of the Malay Barrier, 1941-1942 Jul 17

2022 Though few realize it, the Netherlands East Indies were the object of Japan's attack on Pearl Harbor in December 1941.

Likewise, their invasions of Guam, Wake Island and the Philippines were mainly diversionary operations to safeguard their main assault on Dutch and British colonies. Since the end of World War I, Japan had coveted the vast East Indies oil reserves, and the colony had feared invasion since Germany overran Holland in May 1940. Isolated politically the weakly defended archipelago was a tempting prize. The East Indies government initially maintained a strict policy of neutrality while desperately working to build up its military strength. As Japanese actions pushed the region toward war, the Dutch reluctantly embraced closer ties with America and Britain. For a brief period, the East Indies were key players in Pacific War strategy. This book details for the first time in English the Dutch prewar strategy, their efforts to counter Japanese espionage and their sizable though largely forgotten military contribution in the early months of the Pacific War.

Solar, Wind and Land Oct 16 2019 The global demand for clean, renewable energy has rapidly expanded in recent years and will likely continue to escalate in the decades to come. Wind and solar energy systems often require large quantities of land and airspace, so their growing presence is generating a diverse array of new and challenging land use conflicts. Wind turbines can create noise, disrupt views or radar systems, and threaten bird populations. Solar energy projects can cause glare effects, impact pristine wilderness areas, and deplete water resources. Developers must successfully navigate through these and myriad other land use conflicts to complete any renewable energy project. Policymakers are increasingly confronted with disputes over these issues and are searching for rules to effectively govern them. Tailoring innovative policies to address the unique conflicts

that arise in the context of renewable energy development is crucial to ensuring that the law facilitates rather than impedes the continued growth of this important industry. This book describes and analyses the property and land use policy questions that most commonly arise in renewable energy development. Although it focuses primarily on issues that have arisen within the United States, the book's discussions of international policy differences and critiques of existing approaches make it a valuable resource for anyone exploring these issues in a professional setting anywhere in the world.

Crash Nov 16 2019 In this hallucinatory novel, an automobile provides the hellish tableau in which Vaughan, a "TV scientist" turned "nightmare angel of the highways," experiments with erotic atrocities among auto crash victims, each more sinister than the last. James Ballard, his friend and fellow obsessive, tells the story of this twisted visionary as he careens rapidly toward his own demise in an internationally orchestrated car crash with Elizabeth Taylor. A classic work of cutting-edge fiction, *Crash* explores both the disturbing implications and horrific possibilities of contemporary society's increasing dependence on technology as intermediary in human relations.

The Burn Pits Sep 19 2022 "There's a whole chapter on my son Beau... He was co-located [twice] near these burn pits." -Joe Biden, former Vice President of the United States of America *The Agent Orange of the 21st Century...* Thousands of American soldiers are returning from the battlefields of Iraq and Afghanistan with severe wounds from chemical war. They are not the victims of ruthless enemy warfare, but of their own military commanders. These soldiers, afflicted with rare cancers and respiratory diseases, were sickened from the smoke and ash swirling out of the "burn pits" where military contractors incinerated mountains of trash, including old stockpiles of mustard and sarin gas, medical waste, and other toxic material. This shocking work includes: Illustration of the devastation in one

soldier's intimate story A plea for help Connection between the burn pits and Major Biden's unfortunate suffering and death The burn pits' effects on native citizens of Iraq: mothers, fathers, and children Denial from the Department of Defense and others Warning signs that were ignored and much more Based on thousands of government documents, over five hundred in-depth medical case studies, and interviews with more than one thousand veterans and active-duty GIs, *The Burn Pits* will shock the nation. The book is more than an explosive work of investigative journalism—it is the deeply moving chronicle of the many young men and women who signed up to serve their country in the wake of 9/11, only to return home permanently damaged, the victims of their own armed forces' criminal negligence.

Business Communication: Process and Product Aug 26 2020 *BUSINESS COMMUNICATION: PROCESS AND PRODUCT*, 8e, is designed to prepare students for success in today's digital workplace. The textbook presents the basics of communicating in the workplace, using social media in a professional environment, working in teams, becoming a good listener, and presenting individual and team presentations. Authors Mary Ellen Guffey and Dana Loewy also offer a wealth of ideas for writing resumes and cover letters, participating in interviews, and completing follow-up activities. Optional grammar coverage in each chapter, including a comprehensive grammar guide in the end-of-book appendix, helps students improve their English language skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Energy Security, Equality and Justice Dec 10 2021 This book applies concepts from ethics, justice, and political philosophy to five sets of contemporary energy problems cutting across time, economics, politics, geography, and technology. In doing so, the authors derive two key energy justice principles from modern

theories of distributive justice, procedural justice, and cosmopolitan justice. The prohibitive principle states that "energy systems must be designed and constructed in such a way that they do not unduly interfere with the ability of people to acquire those basic goods to which they are justly entitled." The affirmative principle states that "if any of the basic goods to which people are justly entitled can only be secured by means of energy services, then in that case there is also a derivative entitlement to the energy services." In laying out and employing these principles, the book details a long list of current energy injustices ranging from human rights abuses and energy-related civil conflict to energy poverty and pervasive and growing negative externalities. The book illustrates the significance of energy justice by combining the most up-to-date data on global energy security and climate change, including case studies and examples from the electricity supply, transport, and heating and cooking sectors, with appraisals based on centuries of thought about the meaning of justice in social decisions.

The Memo Jul 05 2021

Estimating the Accident Risk of Older Drivers Jul 25 2020 As the U.S. population ages, so will the population of licensed drivers. Policymakers are concerned that this will lead to increases in traffic accidents and, consequently, injury to property and person. This report investigates how this aging will likely affect traffic safety.

Six Days in October Dec 18 2019 Publisher Description

Base Nation Oct 28 2020 From Italy to the Indian Ocean, from Japan to Honduras, a far-reaching examination of the perils of American military bases overseas American military bases encircle the globe. More than two decades after the end of the Cold War, the U.S. still stations its troops at nearly a thousand locations in foreign lands. These bases are usually taken for granted or overlooked entirely, a little-noticed part of the Pentagon's vast operations. But in an eye-opening account, Base

Nation shows that the worldwide network of bases brings with it a panoply of ills—and actually makes the nation less safe in the long run. As David Vine demonstrates, the overseas bases raise geopolitical tensions and provoke widespread antipathy towards the United States. They also undermine American democratic ideals, pushing the U.S. into partnerships with dictators and perpetuating a system of second-class citizenship in territories like Guam. They breed sexual violence, destroy the environment, and damage local economies. And their financial cost is staggering: though the Pentagon underplays the numbers, Vine's accounting proves that the bill approaches \$100 billion per year. For many decades, the need for overseas bases has been a quasi-religious dictum of U.S. foreign policy. But in recent years, a bipartisan coalition has finally started to question this conventional wisdom. With the U.S. withdrawing from Afghanistan and ending thirteen years of war, there is no better time to re-examine the tenets of our military strategy. *Base Nation* is an essential contribution to that debate.

A Wreck on the Road to Damascus Apr 02 2021 An examination of O'Connor's use of religious themes such as original sin, redemption, and the incarnation. Discusses her assertion that individual freedom is an illusion, and her embodiment of that illusion in the image of the automobile. Draws chiefly on the novel *Wise Blood* and the stories *Your Own Cloth*. \$13. No index. Annotation copyrighted by Book News, Inc., Portland, OR
