The Virginia Title Insurance Pre-Licensing Study Guide, published by the Virginia Land Title Association, is a resource for students of the Virginia Land Title Association title insurance pre-licensing class. Parise and Loudon's Study Guide and Solutions Manual offers the following learning aids: * Links that provide hints for study, approaches to problem solving, and additional explanations of challenging topics; * Further Explorations that provide additional depth on key topics; * Reaction summaries that delve into key mechanisms and stereochemistry; * Solutions to all the textbook problems. Rather than providing just the answer, many of the solutions provide detailed explanations of how the problem should be approached. June 1863. The American Civil War was two years old, and the U.S. Army in Virginia was in chaos. Reeling after the recent defeat at Chancellorsville, the Federals, especially the Cavalry Corps, scrambled

to regroup. Confederate general Robert E. Lee seized the moment to launch a second invasion of the North. As Lee slipped away, frantic Federal leaders asked, "Where are the Rebels?" At this critical moment, the much-maligned Federal cavalry stepped to center stage. Small but Important Riots is a tactical study of fighting from June 17 to 22, 1863, at Aldie, Middleburg, and Upperville, placed within the strategic context of the Gettysburg campaign. It is based on Robert O'Neill's thirty years of research and access to previously unpublished documents, which reveal startling new information. Since the fighting in Loudoun Valley of Virginia ended in June 1863, one perspective has prevailed--that Brigadier General Alfred Pleasonton, who commanded the Cavalry Corps, Army of the Potomac, disobeyed orders. According to published records, Pleasonton's superiors, including President Abraham Lincoln, Secretary of War Edwin Stanton, and army commander Joseph Hooker, ordered Pleasonton to search for General Robert E. Lee's Army of Northern Virginia during a critical stage of the Gettysburg campaign, and Pleasonton ignored their orders. Recently discovered documents--discussed in this book--prove otherwise. Oral history is a marvelous force for empowering young people with a love of history. Peppared with useful tips, examples from students and teachers, and reproducible forms, along with an comprehensive bibliography, this book will be a vital and inspirational tool for anyone working with secondary students to plan and carryout oral history projects. This is a Foreword by an archaeologist, not a conservator, but as Brad Rodgers says, “Conservation has been steadily pulled from archaeology by the forces of specialization”(p.

3),andhewantstoremedythatsituationthroughthismanual. He seesthisworkasa“calltoactionforthenon-professionalconservator,”permitting “curators, conservators, and archaeologists to identify artifacts that need professional attention and, allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention, using simple non-toxic procedures” (p. 5). It is the mission of Brad’s manual to “bring conservation back into archaeology” (p. 6). The degree of success of that goal depends on the degree to which archaeologists pay attention to, and put to use, what Brad has to say, because as he says, “The conservationist/archaeologist is responsible to make preparation for an artifact’s care even before it is excavated and after its storage into the foreseeable future”. . . a tremendous responsibility” (p. 10). The manual is a combination of highly technical as well as common sense methods of conserving wood, iron and other metals, ceramics, glass and stone, organicsandcomposites—afarbetterguidetoartifactconservationthanwasavailable to me when I first faced that archaeological challenge at colonial Brunswick Town, North Carolina in 1958—a challenge still being faced by archaeologists today. The stage of conservation in 1958 is in

dramatic contrast to the procedures Brad describes in this manual—conservation has indeed made great progress. For instance, a common procedure then was to heat the artifacts red hot in a furnace—a method that made me cringe.
