Frames of Understanding in Text and Discourse Oct 28 2020*

How do words mean? What is the nature of meaning? How can we grasp a word's meaning? The frame-semantic approach developed in this book offers some well-founded answers to such long-standing, but still controversial issues. Following Charles Fillmore's definition of frames as both organizers of experience and tools for understanding, the monograph attempts to examine one of the most important concepts of Cognitive Linguistics in more detail. The point of departure is Fillmore's conception of "frames of understanding" - an approach to (cognitive) semantics that Fillmore developed from 1975 to 1985. The envisaged Understanding Semantics ("U-Semantics") is a semantic theory sui generis whose significance for linguistic research cannot be overestimated. In addition to its crucial role in the development of the theoretical foundations of U-semantics, corpus-based frame semantics can be applied fruitfully in the investigation of knowledge-building processes in text and discourse.

I Will Surely Multiply Your Offspring Jun 23 2020 After creating man and woman, God's first recorded blessing upon them is "be fruitful and multiply." Like the blessings of food and health, the human experience of procreation is so common that we may overlook its importance within the biblical narrative. However, I Will Surely Multiply Your Offspring, a comprehensive examination of the progeny blessing, demonstrates that this motif is both prevalent and significant within the Old Testament by tracing its development throughout the redemptive-historical narrative. Viands identifies different progeny blessing traditions associated with the Abrahamic covenant, the Sinai covenant, and the new covenant, and describes their interrelationships as well as their relationship to the universal blessing first found in Genesis 1. This study lays the foundation for a biblical worldview of human proliferation, contributing to contemporary discussions concerning whether humans are

obligated to bear children as well as procreation ethics.

C# and C++ Codes in Gamepad Libraries to Play PC Games Dec 22 2022
Abstract of the book: The gamepads of consoles have invaded PC to play games becoming the replacers of keyboard and mouse, with the same accuracy and more easy to use for a best comfortable experience of gameplay. The codes presented here are for beginner programmers wanting to know how to simulate keyboard and mouse events in order to play PC games using XBox360 gamepad, Wiimote/Nunchuck/Sensor bar, Wii classic controller, Wii guitar hero 3 drums and guitar. This paper gives some information that wasn't finding previously by other authors. It correspond to make run keyboard events to simulate a key press down and up, and assembling snippets to be recognized by all PC games. Viewers can take this paper as a study on the best codes and equations to play the best in all games. Also, the gamers can take this paper to customize their own gamepad with scripts. Author correspondence: michael.franiatte@gmail.com. Texts and Contexts of Jeremiah Feb 24 2023 Based on the examples of Jeremiah 1 and 10, this volume contains contributions of the textual reception and of the exegesis of both chapters. Although textual history and reception history are to be distinguished from each other, they are interconnected, as the textual history of any biblical book is also part of its reception history. Jeremiah 1 and 10 are ideal "test cases" because their textual traditions (MT-Jer and LXX-Jer and its Hebrew Vorlage respectively) differ most significantly in terms of rhetoric, structure and content. The volume demonstrates how the Jeremiah's reception history helps to better understand the textual history of both chapters.

Semantic Web and Web Science Jul 05 2021 The book will focus on exploiting state of the art research in semantic web and web science. The rapidly evolving world-wide-web has led to revolutionary changes in the whole of society. The research and development of the semantic web covers a number of global standards of the web and cutting edge technologies, such as: linked data, social semantic web, semantic web search, smart data integration, semantic web mining and web scale computing. These proceedings are from

the 6th Chinese Semantics Web Symposium.

AWS CLI Command Apr 14 2022 Master the step by step guide to AWS CLI Command Amazon Web Services Cmd line Interface. With just single tool you can configure, control and manage all your AWS Services through command line and automate them with scripts. Some of the services includes are: • apigateway • autoscaling • batch • cloudformation • dynamodb • ec2 • glacier • iam • kms • lambda • machinelearning • rds • route53 • s3 • swf • waf and more.

Securities Regulation & Law Report Sep 19 2022

'Subordination' versus 'Coordination' in Sentence and Text Jul 17 2022 The papers collected in this volume (including a comprehensive introduction) investigate semantic and discourse-related aspects of subordination and coordination, in particular the relationship between subordination/coordination at the sentence level and subordination/coordination - or hierarchical/non-hierarchical organization - at the discourse level. The contributions in part I are concerned with central theoretical questions; part II consists of corpus-based cross-linguistic studies of clause combining and discourse structure, involving at least two of the languages English, German, Dutch, French and Norwegian; part III contains papers addressing specific - predominantly semantic - topics relating to German, English or French; and the papers in part IV approach the topic of subordination, coordination and rhetorical relations from a diachronic (Old Indic and Early Germanic) perspective. The book aims to contribute to

a better understanding of information packaging on the sentence and text level related, within a particular language as well as cross-linguistically.

Code of Federal Regulations: Titles 42 through 50 Oct 16 2019

Perpetrators and Accessories in International Criminal Law Mar 01 2021 International criminal law lacks a coherent account of individual responsibility. This failure is due to the inability of international tribunals to capture the distinctive nature of individual responsibility for crimes that are collective by their very nature. Specifically, they have misunderstood the nature of the collective action or framework that makes these crimes possible, and for which liability may be attributed to intellectual authors, policy makers and leaders. In this book, the author draws on insights from comparative law and methodology to propose doctrines of perpetration and secondary responsibility that reflect the role and function of high-level participants in mass atrocity, while simultaneously situating them within the political and social climate which renders these crimes possible. This new doctrine is developed through a novel approach which combines and restructures divergent theoretical perspectives on attribution of responsibility in English and German domestic criminal law, as major representatives of the common law and civil law systems. At the same time, it analyses existing theories of responsibility in international criminal law and assesses whether there is any justification for their retention by international criminal tribunals.
