One Zambia, Many Histories Oct 16 2019 In contrast to the rich tradition of academic analysis and understanding of the pre-colonial and colonial history of Zambia, the trajectory of post-colonial Zambia has been all but ignored by historians. The assumptions of developmentalism, the cultural hegemony of United National Independence Party orthodoxy and its conflation with national interests, and a narrow focus on Zambia's diplomatic role in Southern African affairs, have all contributed to a dearth of studies centring on the diverse lived experiences of Zambians.

Language in Zambia Jul 25 2020 Originally published in 1978, this volume is divided into 3 parts. Part 1 presents an overview of the linguistic situation in Zambia: who speaks which languages, where they are spoken, what these languages are like. Special emphasis is given to the extensive survey of the languages of the Kafue basin, where extensive changes and relocations have taken place. Part 2 is on language use: patterns of competence and of extension for certain languages in urban settings, configurations of comprehension across language boundaries, how selected groups of multilinguals employ each of their languages and for what purposes, what languages are used in radio and television broadcasting and how decisions to use or not use language are made. Part 3 involves language and formal

education: what languages, Zambian and foreign, are used at various levels in the schools, which are taught, with what curricula, methods, how teachers are trained, how issues such as adult literacy are approached and with what success.

Papers in African Prehistory Jan 19 2020 Professor Fage and Professor Oliver, the editors of this collection, are distinguished historians of Africa, and as founding editors of the Journal of African History they both established the journal and used it to mark out developing areas of the subject. In directing the journal they have pursued an active policy of commissioning articles in fields where the literature was scanty, and in this volume they have collected together some of the most important articles they have published on African prehistory. It is designed for the student of African history, and the library that needs copies of frequently consulted papers to supplement its sets of periodicals. All the articles contain either accounts of important research or more general review articles. The book is illustrated with line diagrams and photographs. One article which originally appeared in French has been translated into English.
