Because some classes of people may not have been considered worthy of notice by dominant social groups in the past, they may be less visible to us today in historical and archaeological records; consequently, they remain less studied. This volume attempts to redress this oversight by presenting case studies of historical and archaeological research on various ethnic, racial, gender, and socioeconomic groups in colonial and post-colonial North America. These contributions illustrate how historical archaeologists and ethnohistorians have used documentary and archaeological evidence to retrieve information on neglected aspects of American history. They explore ways of making more visible Native Americans, African Americans, and Euro-Americans of differing ethnic groups and economic classes, and also shed new light on such groups as celibate religious communities, women in predominantly male communities, and working-class and middle-class women in urban communities. Material evidence on "those of little note" provides not only fresh insight into our understanding of daily life in the past, but also a refreshing counterpoint to the male- and Euro-centered analysis that has characterized much of historical archaeology since its inception. Readers will find many chapters rewarding in their application of sophisticated

feminist theory to archaeological data, or in their probing of complex relational issues concerning the construction of gender identity and gender relationships. As the first archaeologically-focused collection to examine the interconnectedness of gender, class, race, and ethnicity in past societies, *Those of Little Note* sets new standards for future research.

The majestic abstract paintings of the accomplished contemporary artist. The articles in this volume shed light on some of the major tensions in the field of children's rights (such as the ways in which children's best interests and respect for their autonomy can be reconciled), challenges (such as how the CRC can be made a reality in the lives of children in the face of ignorance, apathy or outright opposition) and critiques (whether children's rights are a Western imposition or a successful global consensus). Along the way, the writing covers a myriad of issues, encompassing the opposition to the CRC in the US; gay parenting; Dr Seuss's take on children's autonomy; the voice of neonates on their health care; the role of NGO in supporting child labourers in India, and young people in detention and more.

ASR Index is a complete and detailed index of everything that has appeared in the *Antique Studebaker Review* magazine since its inception in 1971. Of greatest importance are the advice items that are indexed by subject (engines, brakes, steering, etc.). Historical items are also indexed by subject as well as by the vehicle (model and year) they relate to. If you own, for instance, a 1939 Champion, ASR Index will give you instant access to everything that has been published about your car and much more. Indexed by model, year, AND subject matter, ASR Index is detailed and comprehensive, making it easy to find the information you need. Each listing, of course, refers you to the specific issue of *Antique Studebaker Review* and cites the page on which the item begins. ASR Index includes issues of *Antique Studebaker Review* from 1971 through 2019 by subject, model, and year. It contains more than 4,300 references on 55 pages.

Progressive failure has been a classical problem in the field of geotechnical engineering and has attracted considerable attention in connection with slope stability and foundation problems. It is associated with strain localization or shear banding and is also related to damage in material structures. As knowledge of the progressive failure mechanism increases, it is now necessary to establish effective communications between researchers and engineers. The International Symposium on Deformation and Progressive

Failure in Geomechanics provided an opportunity for discussing recent advances in this area. A total of 136 papers were contributed from 22 countries. As well as these, the symposium proceedings also contain 8 interim technical reports on the subject by the members of the Asian Technical Committee of the International Society for Soil Mechanics and Foundation Engineering and the Japanese Geotechnical Society National Committee on Progressive Failure in Geo-structures. Spread the love with note-worthy moments! Love Notes gives you more than two dozen clever ways to quickly put a smile on your loved one's face. Boker (English and comparative literature, Columbia U.) examines the "prolonged adolescence" of the American male canon, focusing in depth on the work of Melville, Twain, and Hemingway. Boker reveals in these authors' lives and fiction a world of perpetual adolescence, repressed grief, and repudiation of feminine identification. Little notes, sweet and unexpected, say everything you need, when you only need to say a little. Perfectly sized to slip in a sweetheart's pocket, deliver to a coworker's desk, or attach to a bottle of wine, your little notes will delight on all occasions. Each note features a spot illustration--a delicate flower, a graceful branch--that adds charm to your special message. In fourteen essays, supplemented by relevant sections of and amendments to the Constitution and five Federalist essays by Hamilton--provides the reader with the essential historical and political analyses of who and what shaped the presidency. Small jurisdictions have become significant players in cross-border corporate and financial services. Their nature, legal status, and market roles, however, remain under-theorized. Lacking a sufficiently nuanced framework to describe their functions in cross-border finance - and the peculiar strengths of those achieving global dominance in the marketplace - it remains impossible to evaluate their impacts in a comprehensive manner. This book advances a new conceptual framework to refine the analysis and direct it toward more productive inquiries. Bruner canvasses extant theoretical frameworks used to describe and evaluate the roles of small jurisdictions in cross-border finance. He then proposes a new concept that better captures the characteristics, competitive strategies, and market roles of those achieving global dominance in the marketplace - the "market-dominant small jurisdiction" (MDSJ). Bruner identifies the central features giving rise to such jurisdictions' competitive strengths - some reflect historical, cultural, and geographic circumstances, while others reflect development strategies pursued in light of those circumstances. Through this lens, he evaluates a range of small jurisdictions that have achieved global dominance in specialized areas of cross-border finance, including Bermuda, Dubai, Singapore, Hong Kong, Switzerland, and Delaware.

Bruner further tests the MDSJ concept's explanatory power through a broader comparative analysis, and he concludes that the MDSJs' significance will likely continue to grow - as will the need for a more effective means of theorizing their roles in cross-border finance and the global dynamics generated by their ascendance.
