**Ethical Issues for a New Millennium** Dec 25 2020 Modern advances in science and medicine bring with them an array of complex ethical dilemmas. In "Ethical Issues for a New Millennium" editor John Howie addresses contemporary ethical problems with eight essays from top thinkers in the field. "This collection offers new and comprehensive overviews of some very tough ethical issues that will remain foremost in our minds in the years ahead. Each essay is written by a recognized authority within his or her specific field, and brings to light ethical questions rooted in ongoing philosophical debates in arenas such as human rights, the welfare state, women's rights, genetic and gender equality, genetic equity, cloning, organ transplants, environmental ethics, insurrectionist ethics, and the erosion of moral sensibility. These lectures were originally presented at Southern Illinois University as part of the Wayne Leys Memorial Lectures series. This collection represents the fourth volume in the series. "

*A Recent History of Recognized Economic Thought: Contributions of the Nobel Laureates to Economic Science* Jun 30 2021 Since

1969, 75 people have been awarded the Nobel Prize in Economics. Recent Recognized "A History of Economic Thought - Contributions of the Nobel Laureates to Economic Science" describes their major accomplishments in a manner so all readers, regardless of their knowledge of economics, can appreciate the efforts of these scholars and their impact on the development and progress of economic science. Begin with a brief tour of economic thought and the factors that have influenced economic doctrine from the 16th through the 20th century. Then, for each Nobel Laureate, learn about their background and professional affiliations. Complete your understanding of each Laureate's accomplishments with a concise, relatively non-technical summary of their Nobel Prize Lecture.

Ethics, Rationality, and Economic Behaviour Mar 16 2020 The connection between economics and ethics is as old as economics itself, and central to both disciplines. The essays included in the present volume provide an analysis of the connections between ethics and economics as viewed from several different - oft

**Ethics of Global Development** Jul 12 2022 Poverty, inequality, violence, environmental degradation, and tyranny continue to afflict the world. Ethics of Global Development offers a moral reflection on the ends and means of local, national, and global efforts to overcome these five scourges. After emphasizing the role of ethics in development studies, policy-making, and practice, David A. Crocker analyzes and evaluates Amartya Sen's philosophy of development in relation to alternative ethical outlooks. He argues that Sen's turn to robust ideals of human agency and democracy improves on both Sen's earlier emphasis on 'capabilities and functionings' and Martha Nussbaum's version of the capability orientation. This agency-focused capability approach is then extended and strengthened by applying it to the challenges of consumerism and hunger, the development responsibilities of affluent individuals and nations, and the dilemmas of globalization. Throughout the book the author argues for the importance of more inclusive and deliberative democratic institutions.

Cosmopolitan Justice Apr 09 2022 Increasing global economic integration and recent military interventions in the name of human rights have forced questions of global justice into political discussions. In presenting a systematic account of global duties of justice, Cosmopolitan Justice departs from many contemporary accounts that take the scope of justice to be limited to the state or nation. Is the unequal distribution of wealth across the globe just? Are the most indebted countries obliged to pay back their loans to international financial institutions? Does respecting state sovereignty prohibit intervening in the affairs of other states? What is the moral basis of international law? Cosmopolitan Justice takes on these questions and much more.

*A Moral Theory of Political Reconciliation* Feb 07 2022 Following extended periods of conflict or repression, political reconciliation is indispensable to the establishment or restoration of democratic relationships and critical to the pursuit of peacemaking globally. In this book, Colleen Murphy offers an innovative analysis of the moral problems plaguing political relationships under the strain of civil conflict and repression. Focusing on the unique moral damage that attends the deterioration of political relationships, Murphy

identifies the precise kinds of repair and transformation that processes of political reconciliation ought to promote. Building on this analysis, she proposes a normative model of political relationships. A Moral Theory of Political Reconciliation delivers an original account of the failure and restoration of political relationships, which will be of interest to philosophers, social scientists, legal scholars, policy analysts, and all those who are interested in transitional justice, global politics, and democracy.

**Inequality and Poverty Re-Examined** Mar 08 2022 The issues surrounding poverty and inequality continue to be of central concern to academics, politicians and policy makers but the ways in which we seek to study and understand them continue to change over time. This accessible book seeks to provide a guide to some of the new approaches that have been developed in the light of international initiatives to reduce poverty and the notable changes in income inequality and poverty that have occurred across many western countries in recent years. These new approaches have to some degree been facilitated by the emergence of new techniques and a growing availability of data that enable cross national comparisons not only of income but also of measures of welfare such as educational achievement, nutritional status in developing countries and wealth and deprivation indicators in the developed world. Including specially commissioned research from a distinguished list of international authors, this volume makes a real contribution to the public debate surrounding inequality and poverty as well as providing new empirical information about them from around the world.

*On the Currency of Egalitarian Justice, and Other Essays in Political Philosophy* Feb 24 2021 G. A. Cohen was one of the most gifted, influential, and progressive voices in contemporary political philosophy. At the time of his death in 2009, he had plans to bring together a number of his most significant papers. This is the first of three volumes to realize those plans. Drawing on three decades of work, it contains previously uncollected articles that have shaped many of the central debates in political philosophy, as well as papers published here for the first time. In these pieces, Cohen asks what egalitarians have most reason to equalize, he considers the relationship between freedom and property, and he reflects upon ideal theory and political practice. Included here are classic essays such as "Equality of What?" and "Capitalism, Freedom, and the Proletariat," along with more recent contributions such as "Fairness and Legitimacy in Justice," "Freedom and Money," and the previously unpublished "How to Do Political Philosophy." On ample display throughout are the clarity, rigor, conviction, and wit for which Cohen was renowned. Together, these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin, John Rawls, Amartya Sen, and Isaiah Berlin.

**Arguments for a Better World: Essays in Honor of Amartya Sen** Aug 13 2022 Amartya Sen has made deep and lasting contributions to the academic disciplines of economics, philosophy, and the social sciences more broadly. He has engaged in policy dialogue and public debate, advancing the cause of a human development focused policy agenda, and a tolerant and democratic polity. This argumentative Indian has made the case for the poorest of the poor, and for plurality in cultural perspective. It is not surprising

that he has won the highest awards, ranging from the Nobel Prize in Economics to the Bharat Ratna, India's highest civilian honor. This public recognition has gone hand in hand with the affection and admiration that Amartya's friends and students hold for him. This volume of essays, written in honor of his 75th birthday by his students and peers, covers the range of contributions that Sen has made to knowledge. They are written by some of the world's leading economists, philosophers and social scientists, and address topics such as ethics, welfare economics, poverty, gender, human development, society and politics. The second volume covers the topics of Human Development and Capabilities; Gender and Household; Growth, Poverty and Policy; and Society, Politics and History. It is a fitting tribute to Sen's own contributions to the discourse on Society, Institutions and Development. Contributors include: Bina Agarwal, Isher Ahluwalia, Montek S Ahluwalia, Ingela Alger, Muhammad Asali, Amiya Kumar Bagchi, Pranab Bardhan, Lourdes Benería, Sugata Bose, Lincoln C. Chen, Martha Alter Chen, Kanchan Chopra, Simon Dietz, Sakiko Fukuda-Parr, Jonathan Glover, Cameron Hepburn, Jane Humphries, Rizwanul Islam, Ayesha Jalal, Mary Kaldor, Sunil Khilnani, Stephan Klasen, Jocelyn Kynch, Enrica Chiappero Martinetti, Kirsty McNay, Martha C. Nussbaum, Elinor Ostrom, Gustav Ranis, Sanjay G. Reddy, Emma Samman, Rehman Sobhan, Robert M. Solow, Nicholas Stern, Frances Stewart, Ashutosh Varshney, Sujata Visaria, and Jörgen W. Weibull.

**Social Choice Re-examined** Oct 15 2022 Since World War II the subject of social choice has grown in many and surprising ways. The impossibility theorems have suggested many directions: mathematical characterisations of voting structures satisfying various sets of conditions, the consequences of restricting choice to certain domains, the relation to competitive equilibrium and the core, and trade-offs among the partial satisfactions of some conditions. The links with classical and modern theories of justice and, in particular, the competing ideas of rights and utilitarianism have shown the power of formal social choice analysis in illuminating the most basic philosophical arguments about the good social life. Finally, the ideals of the just society meet with the play of self interest; social choice mechanisms can lend themselves to manipulation, and the analysis of conditions under which given ideals can be realised under self interest is a political parallel to the welfare economics of the market. The contributors to these volumes focus on these issues at the forefront of current research.

**Rawls's Political Liberalism** Nov 23 2020 Leading figures in politics and philosophy revitalize Rawls's prescription for a just society.

**Wellbeing, Freedom and Social Justice** Sep 14 2022 How do we evaluate ambiguous concepts such as wellbeing, freedom, and social justice? How do we develop policies that offer everyone the best chance to achieve what they want from life? The capability approach, a theoretical framework pioneered by the philosopher and economist Amartya Sen in the 1980s, has become an increasingly influential way to think about these issues. Wellbeing, Freedom and Social Justice: The Capability Approach Re-Examined is both an introduction to the capability approach and a thorough evaluation of the challenges and disputes that have engrossed the scholars who have developed it. Ingrid Robeyns offers her own illuminating and rigorously interdisciplinary interpretation, arguing that by appreciating the distinction between the general capability approach and more specific capability theories or applications we can create

a powerful and flexible tool for use in a variety of academic disciplines and fields of policymaking. This book provides an original and comprehensive account that will appeal to scholars of the capability approach, new readers looking for an interdisciplinary introduction, and those interested in theories of justice, human rights, basic needs, and the human development approach.

**Amartya Sen's Work and Ideas** Apr 16 2020 This volume is the only one of its kind to explore Sen's work from a gender perspective. A special issue of the journal *Feminist Economics*, it features multidisciplinary contributions and new material.

**Capabilities Equality** May 30 2021 The capabilities approach to equality, developed by Amartya Sen and Martha Nussbaum, seeks to answer the question: what is a proper measure of a person's condition for the purposes of determining what we owe each other, as a matter of justice? While the capabilities theory has avoided many of the conceptual difficulties that have undermined competing accounts of egalitarian justice, recent criticisms have raised questions regarding the focus, structure and justification of the theory. In this volume, leading scholars present new and original essays that address these controversies.

**The Oxford Handbook of the Social Science of Poverty** Dec 05 2021 Despite remarkable economic advances in many societies during the latter half of the twentieth century, poverty remains a global issue of enduring concern. Poverty is present in some form in every society in the world, and has serious implications for everything from health and well-being to identity and behavior. Nevertheless, the study of poverty has remained disconnected across disciplines. The *Oxford Handbook of the Social Science of Poverty* builds a common scholarly ground in the study of poverty by bringing together an international, inter-disciplinary group of scholars to provide their perspectives on the issue. Contributors engage in discussions about the leading theories and conceptual debates regarding poverty, the most salient topics in poverty research, and the far-reaching consequences of poverty on the individual and societal level. The volume incorporates many methodological perspectives, including survey research, ethnography, and mixed methods approaches, while the chapters extend beyond the United States to provide a truly global portrait of poverty. A thorough examination of contemporary poverty, this Handbook is a valuable tool for non-profit practitioners, policy makers, social workers, and students and scholars in the fields of public policy, sociology, political science, international development, anthropology, and economics.

*The Case Against Consequentialism Reconsidered* Nov 11 2019 This book argues that critics of consequentialism have not been able to make a successful and comprehensive case against all versions of consequentialism because they have been using the wrong methodology. This methodology relies on the crucial assumption that consequentialist theories share a defining characteristic. This text interprets consequentialism, instead, as a family resemblance term. On that basis, it argues quite an ambitious claim, viz. that all versions of consequentialism should be rejected, including those that have been created in response to conventional criticisms. The

book covers a number of classic themes in normative ethics, metaethics and, particularly, ethical methodology and also touches upon certain aspects of experimental moral philosophy. It is written in clear language and is analytic in its argumentative style. As such, the book should appeal to students, graduate students as well as professional academics with an interest in analytic moral philosophy.

*Social Choice Re-examined* Jul 20 2020

Human Rights Trade-Offs in Times of Economic Growth Jun 18 2020 This book uncovers a historical dependency on smelting activities that has trapped inhabitants of La Oroya, Peru, in a context of systemic lack of freedom. La Oroya has been named one of the most polluted places on the planet by the US Blacksmith Institute. Residents face the dilemma of whether to defend their health or to preserve job stability at the local smelter, the main source of toxic pollution in town. Valencia unpacks this paradoxical human rights trade-off. This context, shaped by social, historical, political, and economic factors, increases people's vulnerabilities and decreases their ability to choose, resulting in residents' trading off their right to health in order to work. This book shows the deep connection of this local dilemma to the country's national paradox, arising out of Peru's vision of natural resource extraction as the main path to secure economic growth for the entire country at the expense of some groups.

**The Political Thought of Jacques Rancière** Jun 11 2022 This book examines the political perspective of French thinker and historian Jacques Rancière. Rancière argues that a democratic politics emerges out of people's acting under the presupposition of their own equality with those better situated in the social hierarchy. Todd May examines and extends this presupposition, offering a normative framework for understanding it, placing it in the current political context, and showing how it challenges traditional political philosophy and opens up neglected political paths. He demonstrates that the presupposition of equality orients political action around those who act on their own behalf—and those who act in solidarity with them—rather than, as with the political theories of John Rawls, Robert Nozick, and Amartya Sen, those who distribute the social goods. As May argues, Rancière's view offers both hope and perspective for those who seek to think about and engage in progressive political action.

**Genes, Women, Equality** Oct 11 2019 Genetics is not gender neutral in its impact. Mahowald cites a wide range of biological and psychosocial examples that reveal its different impact on men and women, especially with regard to reproduction and caregiving. She examines the extent to which these differences are associated with gender injustice, arguing for positions that reduce inequality between the sexes. The critical perspective Mahowald brings to this analysis is an egalitarian interpretation of feminism that demands attention to inequalities arising from racism, ethnocentrism, ableism, and classism as well as sexism. Eschewing a notion of equality as sameness, Mahowald defines equality as attribution of the same value to different objects. Gender justice, she claims, imputes the same value to men and women, despite their differences. It can only be maximized by practical efforts to equalize the burdens and benefits associated with genetics. The topics considered include participation in research, allocation of genetic services, cultural difference, sex selection, misattributed paternity, prenatal and preimplantation diagnosis, carrier testing, genetic interventions, genetic

disabilities, preferences for genetic ties to offspring, genetic susceptibility to late onset disorders, behavioral genetics, genetic discrimination in employment and insurance, and human cloning. Cases, both real and concocted, are used to illustrate the questions addressed.

**Grensgebieden van het recht** Oct 03 2021 Theorieën over recht en rechtvaardigheid zijn altijd abstract. Toch worden ze bedacht om oplossingen te zoeken voor heel concrete, dagelijkse problemen. In *Grensgebieden van het recht* stelt Martha Nussbaum deze paradox aan de orde. Aan de hand van drie urgente problemen de positie van mensen met een handicap, van immigranten en van dieren waarvoor tot nu toe niet alleen in theorie, maar ook in de dagelijkse praktijk geen goede oplossingen gevonden zijn, gaat zij op zoek naar concrete denkbeelden over sociale rechtvaardigheid. Deze ideeën kunnen ons leiden naar een verantwoorde omgang met deze problemen.

**Natural Human Rights** May 10 2022 This timely book by internationally regarded scholar of ethics and social/political philosophy, Michael Boylan, focuses on the history, application and significance of human rights in the West and China. Boylan engages the key current philosophical debates prevalent in human rights discourse today and draws them together to argue for the existence of natural, universal human rights. Arguing against the grain of mainstream philosophical beliefs, Boylan asserts that there is continuity between human rights and natural law and that human beings require basic, essential goods for minimum action. These include food, clean water and sanitation, clothing, shelter and protection from bodily harm, including basic healthcare. The achievement of this goal, Boylan demonstrates, will require significant resource allocation and creative methods of implementation involving public and private institutions. Combining technical argument with four fictional narratives about human rights, the book invites readers to engage with the most important aspects of the discipline.

**Inequality Reexamined** Feb 19 2023 The noted economist and philosopher Amartya Sen argues that the dictum “all people are created equal” serves largely to deflect attention from the fact that we differ in age, gender, talents, and physical abilities as well as in material advantages and social background. He argues for concentrating on higher and more basic values: individual capabilities and freedom to achieve objectives. By concentrating on the equity and efficiency of social arrangements in promoting freedoms and capabilities of individuals, Sen adds an important new angle to arguments about such vital issues as gender inequalities, welfare policies, affirmative action, and public provision of health care and education.

Agency, Freedom and Choice Jan 06 2022 In this book, Binder shows that at the heart of the most prominent arguments in favour of value-neutral approaches to overall freedom lies the value freedom has for human agency and development. Far from leading to the adoption of a value-neutral approach, however, ascribing importance to freedom’s agency value requires one to adopt a refined value-based approach. Binder employs an axiomatic framework in order to develop such an approach. She shows that a focus on freedom’s agency value has far reaching consequences for existing results in the freedom ranking literature: it requires one to move beyond a person’s given all-things-considered preferences to the values underlying a person’s preference formation. Furthermore, it requires, as Binder argues, one to account (only) for those differences between choice options which really matter to people. Binder illustrates the implications of her analysis for the evaluation of public policy and human development with the capability approach: only if sufficient

importance is ascribed to freedom's agency value can the capability approach keep its promises. ?

*Amartya Sen's Inequality Re-Examined* Dec 17 2022 Amartya Sen's *Inequality Re-Examined* is a seminal text setting out a theory to evaluate social arrangements and inequality. By asking the question, 'equality of what'?, Sen shows that (in)equality should be assessed as human freedom; for people to have the ability to pursue and achieve goals they value or have reason to value. The text lays out the fundamental ideas to Amartya Sen's Capability Approach. This approach is celebrated in diverse academic disciplines because of its specific contribution towards the improvement to debates on inequality beyond economic deprivation and utility measures. Furthermore, the arguments put forward by Sen in *Inequality Re-Examined* has had many practical applications throughout policy circles including the Human Development Index, the Multi –Dimensional Poverty Measure, the compilation of lists of capabilities and drawing further attention to human agency and democracy. Amartya Sen won the Nobel Prize for Economics in 1998 for his contribution to welfare economics; the core arguments of this work is found in this book.

Noncitizenism (Open Access) Mar 28 2021 Noncitizens have always been present in liberal political philosophy. Often hard to situate within traditional frameworks that prioritise citizenship, noncitizens can appear voiceless and rightsless, which has implications for efforts towards global justice and justice in migration. This book proposes an alternative. Noncitizenism identifies an analytical category of noncitizenship. While maintaining the importance of citizenship, noncitizenship is another form of special individual-State relationship. It operates far from a State, at its borders, and within its territory, providing a tool for examining the continuity between sites of engagement and the literatures, questions, and conclusions relating to them. The book argues that an accurate liberal theoretical framework, and one which can address contemporary challenges, must acknowledge the political relationship of noncitizenship between individuals and States. This book is for students and scholars of political philosophy and for those interested in noncitizenship and how it can inform the response of liberal theory, citizenship, global justice, migration studies, political theory and policy work.

**From Disability Theory to Practice** Oct 23 2020 This collection pays tribute to Jerome E. Bickenbach's work that spans from philosophical and sociological issues to international legislation designed to support the rights of people with disabilities. Eight essays critically engage with Bickenbach's work to further advance the discussions he has initiated throughout his career.

**Towards an Ethical Framework for Poverty reduction** Aug 21 2020

*Rethinking Indian Jurisprudence* Sep 02 2021 What is law? What is the source of law? What is the law for? How does law differ from other norms or codes of conduct? What is the difference between law and morality? Who is obligated to follow the law and why? What is the difference between moral and legal obligation? This book addresses these foundational questions about the law in general, and seeks to reorient our thoughts to the specific nature of law in India, the India of today, and the possible India of the future. This volume: covers relevant foundational elements, concepts and questions of the discipline; brings the uniqueness of Indian Philosophy of

Law to the fore; critically analyzes the major theories of jurisprudence; examines legal debates on secularism, rationality, religion, rights and caste politics; and presents useful cases and examples, including free speech, equality and reservation, queer law, rape and security, and the ethics of organ donation. Lucid and accessible, the book will be indispensable to students, teachers and scholars of law, philosophy, politics as well as philosophy of law, sociology of law, legal theory and jurisprudence.

*Development as Freedom* Jan 14 2020 By the winner of the 1988 Nobel Prize in Economics, an essential and paradigm-altering framework for understanding economic development--for both rich and poor--in the twenty-first century. Freedom, Sen argues, is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population. Releasing the idea of individual freedom from association with any particular historical, intellectual, political, or religious tradition, Sen clearly demonstrates its current applicability and possibilities. In the new global economy, where, despite unprecedented increases in overall opulence, the contemporary world denies elementary freedoms to vast numbers--perhaps even the majority of people--he concludes, it is still possible to practically and optimistically restrain a sense of social accountability. *Development as Freedom* is essential reading.

*Human Trafficking and the Feminization of Poverty* Jan 26 2021 This book provides a comprehensive overview of human trafficking in Cambodia and the mechanisms of poverty in Southeast Asia. By examining personal narratives, Yuko Shimazaki traces trafficked women's efforts to liberate themselves from the poverty trap with the aid of external supporting organizations.

**Sociological Theory and the Capability Approach** Sep 21 2020 Sociological Theory and the Capability Approach connects normative strands of sociological theory to the fusion of ethics and economics proposed by Amartya Sen's and Martha Nussbaum's capability approach. Spanning classical (Hegel, Marx, Durkheim, Scheler, Weber) and contemporary debates (Parsons, Giddens, Luhmann) it identifies areas that bridge the current gap between sociology and capability approach. It thus builds on explanatory and normative concerns shared by both traditions. Engaging readers from sociology and capability approach, Spiros Gargas suggests that the proposed dialogue should be layered along the main areas of value theory, economy and society, extending this inquiry into the normative meaning attached to being human. To this end, the book reconstructs the notion of agency along the tracks of Nussbaum's central human capabilities, considering also alienation and the sociology of emotions. It concludes by addressing the capability approach through the lens of social institutions before it takes up the challenge of ideological fundamentalism and how it can be effectively confronted by capability approach. This original book provides a fresh perspective on capability approach as it embeds it in the rich pool of sociological theory's accomplishments. As an exercise in theoretical and normative convergence, it will be required reading for academics and students in social theory, cultural theory, philosophy and human development studies.

**Women's Sport in Africa** May 18 2020 In recent decades Africa has emerged as a sporting giant. The African sporting phenomenon has been addressed in the popular press and it has also attracted scholarly interest; however, this interest is almost entirely focussed on men. Yet women's participation in recreational and elite sport is worthy of exploration and research. This path-breaking collection of essays provides an introduction to a variety of dimensions of women's participation in African sports. Several key concepts are addressed in the book: women and media, women and sport-migration, sport and empowerment, sporting and social development, women's sport and postcolonial Africa, and professional sport and economic development. This collection, authored by established scholars, will attract readership from students from Sports Studies to African Studies and from undergraduate students to university teachers. This book was published as a special issue of *Sport in Society*.

Indigenous Rights Feb 13 2020 Throughout the world, indigenous rights have become increasingly prominent and controversial. The recent adoption by the United Nations General Assembly of the Declaration on the Rights of Indigenous Peoples is the latest in a series of significant developments in the recognition of such rights across a range of jurisdictions. The papers in this collection address the most important philosophical and practical issues informing the discussion of indigenous rights over the past decade or so, at both the international and national levels. Its contributing authors comprise some of the most interesting and influential indigenous and non-indigenous thinkers presently writing on the topic.

The Cambridge Companion to Rawls Dec 13 2019 Each volume of this series of companions to major philosophers contains specially commissioned essays by an international team of scholars and will serve as a reference work for students and nonspecialists. John Rawls is the most significant and influential philosopher and moral philosopher of the twentieth century. His work has profoundly shaped contemporary discussions of social, political and economic justice in philosophy, law, political science, economics and other social disciplines. In this exciting collection of essays, many of the world's leading political and moral theorists discuss the full range of Rawls's contribution to the concepts of political and economic justice, democracy, liberalism, constitutionalism, and international justice. There are also assessments of Rawls's controversial relationships with feminism, utilitarianism and communitarianism. New readers will find this to be an accessible guide to Rawls. Advanced students and specialists will find a conspectus of developments in

the interpretation of Rawls.
