The sixteenth chronicle in the Matthew Bartholomew series. When a wealthy benefactor is found dead in Michaelhouse, Brother Michael and Matthew Bartholomew must find the killer before the College is accused of foul play. At the same time, Cambridge is plagued by a mystery thief, who is targeting pilgrims. Moreover, pranksters are at large in the University, staging a series of practical jokes that are growing increasingly dangerous, and that are dividing scholars into bitterly opposed factions. Bartholomew and Michael soon learn that their various mysteries are connected, and it becomes a race against time to catch the killer-thief before the University explodes into a violent conflict that could destroy it forever. 'A first-rate treat for lovers' (Historical Novels Review) 'Susanna Gregory has an extraordinary ability to conjure up a strong sense of time and place' (Choice) In the early 1970s, three young girls were slain near Rochester, NY, in the so-called Alphabet murders. The book fully devoted to the case explores the crime and its investigation. As the Nazi war machine caused death and destruction throughout Europe, one man in the Fatherland led his own reign of terror. This is the true story of the pursuit and capture of a serial killer in the heart of the Third Reich. For all appearances, Paul Ogorzow was a model German. An employed family man, party member, and sergeant in the infamous Brownshirts, he had worked his way up in the Berlin railroad from a manual laborer laying track to assistant signalman.

also had a secret need to harass and frighten women. They were given a gift from the Nazi high command. Due to Allied bombing raids, a total blackout was instituted throughout Berlin, including on the commuter trains—trains often used by women riding home alone from the factories. Under cover of darkness and with a helpless flock of victims to choose from, Ogorzow's depredations grew more and more horrific. He escalated from simply frightening women to physically attacking them, even raping and murdering them. Beginning in September 1940, he started casually tossing their bodies off the moving train. To the Nazi party tried to censor news of the attacks, the women of Berlin soon lived in a state of constant fear. It was up to Volker Lüdtkke, head of the Berlin police's serious crimes division, to bring down the madman in their midst. For the first time, the gripping full story of Ogorzow's killing spree and Lüdtkke's relentless pursuit is told in dramatic detail.

The fast-moving action stretches from leafy Surrey in England to the world of corporate

giants in New Jersey, America, and back again as it gathers, climaxing in a murderous conclusion. This story takes place in Los Angeles. The serial killer commits his crimes in many of the parks in LA. At one time, he almost kills the detective who is in charge of catching him. The reason for the killer starting down his path of killing is a horrifying story in itself. The extent to which the killer plans on just how he will prepare himself for these killings and the way he does them is unbelievable. Some of the characters he takes shows his nerve and determination. This story shows what police work is about. There is some excitement, some danger, and some dullness. Above it all, it shows the dedication most police officers have. On a cold, windy December night in 1926, he was unleashed on a tenant farm near Farwell, the last Texas town before the New Mexico border. Prone to the bottle and fits of rage, the burly man with the smiling blue eyes was in no mood for a quarrel with his third wife over his bootleg whisky and sexual abuse of his stepdaughter. He went from room to room in the house, killing his wife and each child with primitive cutting tools and his bare hands. By the time he concluded his bloody work, he had taken the lives of nine family members ranging in age from 1 to 41, committing what one local reporter called "the blackest crime" in the history of the West Texas Panhandle. Husband, father, uncle, embezzler, serial mass murderer, philanderer, molester, convict, and military deserter, George Jefferson Hassell was many things to many people, most of them bad. His path of familicide crime had begun in 1917, when he slaughtered his common-law wife and her three kids in Whittier, California. Later, in Texas, he married his brother's wife and became stepfather to her eight children. Using Hassell's confessions

his many interviews with reporters as well as the trial transcripts and reminiscences of those who crossed paths with him in Oklahoma, and California, Mitchel P. Roth presents the first comprehensive account of the life and crimes of one of the most known multiple murderers in Texas, let alone American, history. Roth situates Hassell's saga within the 1920s Texas criminal justice system, including the death penalty, which Hassell ultimately received from Old Sparky, the electric chair at Huntsville. Tara Jones is being hunted by the H Group, a group of hit men for hire. Will she survive? And who is Assassin number Fifty-Six and what are his true intentions toward her. Will he kill her, or is he just trying to kill her also? Welcome to the H GROUP underground headquarters, where assassins abound and nothing is as it seems. There are many myths about serial killers that they are all dysfunctional loners; all white males; only motivated by sex; that they all travel and operate across a wide area; cannot stop killing; are all insane, or evil geniuses; and that they all want to get caught. Of course, there are some serial killers who fit into these categories, but the married Green River Killer was not a dysfunctional loner; there are plenty of female and non-Caucasian serial killers; Dr Harold Shipman was certainly not motivated by sex; many serial killings (such as the Ipswich prostitute murders carried out by Steve Wright) happen within a confined area; the 'BTK Killer', Dennis Rader, stopped killing in 1991, but wasn't caught until fourteen years later. Serial killers may have a low animal cunning, or be 'street smart' but few of them are Mensa-level geniuses. Each of the three cases covered here is unusual in some respect, perhaps in the way in which the killer carried out their crimes, the choice of victims,

way in which they were apprehended, or the method of the execution. The cases are presented alphabetically by country from Australia via Colombia, Great Britain, Indonesia, Iran, South Africa and elsewhere to the United States - and then chronologically. They come from across history and from all over the world. The author has gone back as far as possible to contemporary source material - newspaper accounts, trial evidence, interviews with perpetrators or survivors - rather than rely on the increasingly blurred truth to be found online and in far too many collections. Please note: This is a companion version & not the original book. Sample Book Insights: #1 I was sure the man in the car was now on the other side of the door which only had a simple lock on it. I was afraid to open it for fear of being robbed or murdered. I called my husband and told him about the man at the door, but he said not to worry about it. The man from the FBI came to my apartment to talk about my dad, who was wanted as BTK. I was scared, but I tried to stay calm and asked him questions. #3 My father, Dennis, was the first of four brothers to meet my mother, Paula, at Christ Lutheran Church in 1966. They had one night together, then returned to their respective realities of World War II and the Pacific. #4 My parents, Tom and Nancy, got married in 1970. Dad lived with his parents for a few months, went to Butler Community College and worked part-time at Leeker's. Mom lived with her parents and worked as a secretary at the Veterans Administration. What really happened?

Baffling questions remain unanswered, as these cases were far too soon for hundreds of people; Rule looks at them not through the eyes of a relentless crime reporter. The second began in Utah when Susan Powell vanished in a 2009 blizzard. Her controlling husband, Josh, proved capable of a blind rage that was heartbreakingly fatal to his innocent small sons a few months later in a tragedy that shocked America as the truth unfolded. If anyone had detected the depth of depravity within Josh Powell, perhaps the family that loved and trusted him might have been saved. In these and seven other riveting cases, *Ann Rule's Fatal Friends* exposes the twisted truth behind the façades of Fatal Friends, Deadly Neighbors. These doomed relationships are the focus of queen of true crime Ann Rule's sixteenth all-new *Confessions* Files collection. Lynn Rader stalked and murdered a family of four in Wichita, Kansas. Since adolescence, he had read about serial killers and imagined becoming one. Soon after killing the family, he murdered a young woman and then another, until he had ten victims. He named himself "B.T.K." (bind, torture, kill) and wrote notes that terrorized the city. He remained on the loose for years. No one who knew him guessed his dark secret. He never got away with his crimes, but in 2004, he began to play risk games with the police. He made a mistake. When he was arrested, Rader's family, friends, and coworkers were shocked to discover that B.T.K. had been among them, going to work, raising his children, and acting normal. This case stands out both for the brutal treatment of victims and for the ordinary public face of Rader, a church council president, had shown to the outside world. Through jailhouse visits, telephone calls, and written correspondence, Katherine Ramsland worked with Rader himself to analyze the layers of his psyche. Using his drawings, letters, interviews, and Rader's unique codes, she presents in meticulous detail the childhood roots and development of one man's motivation to stalk, torture, and kill. She reveals aspects of the dark motivations of this most famous of living serial killers that have never before been revealed. In this book Katherine Ramsland presents an intelligent, original, and rare glimpse into the making of a serial killer and the potential darkness that lives next door. After being accused and acquitted in the death of his girlfriend, seventeen-year-old David is sent to live with his uncle, and young cousin to avoid the media frenzy. But all is not well at his relatives' house. His aunt and uncle are not speaking to him, and twelve-year-old Lily seems intent on making David's life

torment. And then there's the issue of his older cousin Kate's mysterious death some years back. As things grow more and more tense, David starts to wonder: is there something else that the family is trying to hide from? Dig deep into the unsolved murder of Jackie English and join the hunt for a serial killer. Fifty years ago, a serial killer prowled the quiet city of London, Ontario, marking it as his hunting grounds. As young women and boys were abducted, raped, and murdered, residents of the area watched their loved ones closer and closer, terrified of the monster monsters — stalking the streets. Homicide detective Dennis Alsup began hunting the killer in the 1960s, and he didn't stop searching until his death 40 years later. For decades, detectives on the ground, actual and armchair, and the victims' families and friends continued to ask questions: Who was the Forest City Killer? Was there more than one person, or did a depraved individual commit all of these crimes on his own? Combing through the files Detective Alsup left behind, researcher Vanessa Brown reopened the cases, revealing previously unpublished witness statements, details of evidence, and astonishing revelations. And through her investigation, Vanessa posits the unthinkable: is it possible that the Forest City Killer is still alive and, like the notorious Golden State Killer, a simple DNA test could bring him to justice? Kinship Data examines the phenomenon of serial murder using data collected from international sources to review offender patterns with a focus on contemporary cases. This type of attention will allow for a broader understanding of modern-day serial murderers and will help to dispel some of the myths that surround offenders. The current serial murder classification scheme incorrectly types serial murderers as supremely intelligent.

machines while discounting their socialization, experiences, choices. This book exposes serial murderers as run-of-the-mill hometown losers, who brutalize women, and are lucky to escape apprehension. Like other atypical homicide offenders, modern day serial murderers are propelled forward by a deep sense of entitlement, easy access to firearms, and a nonchalant attitude toward using murder to attain their goals. Readers should come away with a deeper understanding not of the ultra-rare or "deadliest" serial murderers but of the more common offenders who pose a consistent threat to day-to-day life. The book uses the Consolidated Serial Homicide Offender Database, one of the largest and most robust open access databases of multiple murders available, presenting new thinking on areas such as myths and stereotypes the impact of entertainment on the perception of serial murder inaccurate prevalence estimates spree/serial hybrid offenders the classification of two and victim serial murderers how serial murderers pursue longevity the characteristics of aspiring serial murderers whether hit men and gang members are serial murderers if and why serial murder is in a state of decline how many serial murderers are responsible for the homicides that sent innocent people to prison luck as a factor of "success" for serial murderers. These findings are illustrated with 200 narrative vignettes of serial murder cases that occurred between 2011 and 2021, such as Itzcoatl Ochoa, Charles Severance, Nikko Jenkins, and Pamela Hupp, offenders who may be unfamiliar to many but represent the next iteration of the serial murderer. Correcting decades of flawed assumptions about serial murderers, and written in an accessible and compelling style, Killer Data is essential reading for students and scholars.

criminal justice and criminology, law enforcement professions, and the interested general reader. The essays focus upon popular culture as it is informed by ancient and current mythic images, narratives, personalities, icons and archetypes. The true-crime story of a Massachusetts nurse with a dark secret, by the New York Times bestselling author of *The Girl Left Behind*. At the Veterans Affairs Medical Center in Northampton, Massachusetts, Kristen Gilbert was known as a hardworking, dedicated nurse. Yet so many emergencies and sudden deaths occurred under Kristen's watch that others jokingly called her the "Angel of Death." No one suspected the horrifying truth: that over the course of six years, Gilbert had caused the deaths of as many as forty patients. A new insight into the sociopathic mindset of nurses who kill. The latest details on Gilbert's ongoing prison sentence, M. William Phelps exposes how one person's good intentions can be chillingly, killingly wrong . . . Praise for *Perfect Poison* "True crime at its best—compelling, gripping, an edge-of-the-seat thriller. Phelps packs wallops of delight with his skillful ability to narrate a suspenseful story." —Harvey Rachlin, award-winning author of *Song and System* "A compelling account of terror. first book by Pennie Morehead chronicles the life of Judith, wife of Gary Ridgway, the infamous serial killer of more than 49 women. It contains 112 original photographs and letters, many published here for the first time, and reveal the relationship between Gary and his unsuspecting wife, Judith, who was living some of the happiest years of her life while married to a killer. Ms. Morehead also gives an in depth analysis of Gary's handwritten letters from a professional graphologist point of view. As of this date, despite the diligence of many investigators on this case in locating the victims of the Green River Serial Killer, there remain several bodies of those victims that still need to be discovered. First published in 1994. Routledge is an imprint of Taylor & Francis, an informa company. Thing most terrifying thing about serial killers is that sometimes, they're just like you. The interesting facts in this true crime collection reveal. Even the most diabolical of serial killers was once someone's child, someone's spouse, someone's parent, but somewhere along the line, something happened to send them off the rails on a downward spiral into madness. Wisconsin serial killer Jeffrey Dahmer would tell you he said he was just lonely, and that's why 17 young men ended up dead at his hands. Never mind that he carried around a plastic bag to pick up road kill as a child - a huge harbinger of terrible things to come. The compilation of trivia in this serial killer true crime anthology goes beyond the familiar stories to give you a glimpse of some of the more horrifying aspects of people who have become famous for acts of barbarianism that are unfathomable for most of us. By going behind the scenes, you'll learn more

about the monsters whose stories keep us awake at night, the mundane hidden amongst the horrifying bits that make evening news. These serial killer true crime moments are the ones you'll want to read around the campfire on a moonless summer night. That's if, of course, you're planning on staying up all night. Sleep, if it comes, will be a nightmare. He was a perfect man living a perfect life...which made him a perfect killer. Canadian Air Force Colonel Russell Williams commanded the largest Canadian Forces base in the country. He had personally piloted prime ministers, dignitaries, and members of the British royal family, and was one of the most respected and trusted soldiers in the military. He was also a rapist and a murderer. This is the disturbing true account of how one of Canada's highest-ranking military officers became one of Canada's most notorious criminals, including his ultimate capture, trial and conviction for a twisted spree of sexual deviancy and two rapes and murders. For decades now, serial killers have taken center stage in the news and entertainment media. The coverage of real-life murderers such as Ted Bundy and Jeffrey Dahmer transformed them into ghoulish celebrities. Similarly, the popularity of fictional characters such as Hannibal "The Cannibal" Lecter or Dexter demonstrates just how eager the public is to be frightened by these human predators. But why is this so? Could it be that some of us have a gruesome fascination with serial killers for the same reasons we might morbidly stare at a catastrophic automobile accident? Or is it something more? In *Why We Love Serial Killers*, criminology professor Dr. Scott Bonn explores our powerful appetite for the macabre, while providing new and unique insights into the world of the serial

killer, including those he has gained from his correspondence with two of the world's most notorious examples, David Berkowitz ("Son of Sam") and Dennis Rader ("Bind, Torture, Kill"). In addition, Bonn examines the criminal profiling techniques used by law enforcement professionals to identify and apprehend serial predators, he discusses the various behaviors—such as the charisma of the sociopath—that manifest themselves in serial killers, and he explains how and why these killers often become popular cultural figures. Groundbreaking in its approach, *Why We Love Serial Killers* is a compelling look at how the media, law enforcement agencies, and public perception itself shapes and feeds the "monsters" in our midst. There is nothing ordinary about the 365 days in 1973. The memorabilia names that were headlined were: Nolan Ryan, Bobby Seale, John Norton, Spiro Agnew. The Popular novel was "Winds of War," Paul McCartney was the Pop star, the oil embargo caused Governor Rockefeller to reduce the speed limit to 50 on the Thruway, and the best picture of the year was "The Godfather." looking for bodies. It was unsettling for the locals, usually part of the community named after Baron Von Steuben, a trained Prussian staff officer, requesting his military expertise to aid our country in the Revolutionary War. Few enjoyed the excitement, others felt violated and invaded. Potato Hill would forever be referred to as "Murder Mountain." Before the year was over, three bodies would be discovered in shallow graves and a neighbor would be arrested for murder. The landscape changed forever. This is a true crime story, concluded by a guilty verdict that followed the longest and most expensive trial in the 200-year history of Oneida County. During the four months of trial, 200 prosecution exhibits, 125 defense exhibits, 69 witnesses for prosecution, 17 for the defense and 8,000 pages of testimony would be presented. The verdict of 25 years to life would be imposed on Bernard Paul Hatch on April 11, 1975. Including jury cost, the county spent over one million dollars. In The Trail Of A Sadist... First, he bound and beat his girlfriend, a 43-year-old librarian. Then he went after her teenaged daughter-watching her, "Scream and I will kill you both"-before knocking her unconscious. When the teenager awoke, he proceeded to rape her. And in a final horrifying act of depravity, he forced the girl to watch as he slit her mother's throat. But the killing didn't stop there... In The Crosshairs Of A Killer... Stephen Stanko was described as "a perfect gentleman" who "seemed so pleasant...and so normal." But behind Stanko's mild-mannered appearance, round spectacles, and quiet intelligence was a coldblooded ex-convict who kept a grisly scrapbook on serial killers-and convinced everyone he was a nice guy-until he killed and killed again. On The Trail Of A Psycho... A well-orchestrated

manhunt caught up with Stanko, who tried to get away with his crimes by pleading insanity. But the jury saw through his ruse and the ruthless killer was sentenced to death. For years, neighbors called the police on King, complaining that, among other things, he'd thrown battery acid in their pool and slashed their tires. Denise's fate was far worse. Henry: Portrait of a Serial Killer (1986) is precisely that: a close-eyed character study based on the crimes of Henry Lee Lucas, who was convicted of eleven murders in the 1980s. Director Michael McNamara presents an unflinching portrayal of the semi-fictional Henry's crimes. The film proved immensely controversial, notably in the UK, where it confounded the British Board of Film Classification, which went so far as to re-edit a crucial scene, in addition to cutting others. Shaun Kimber's examination of the controversies surrounding Henry considers the history and implications of censors' decisions about the film on both sides of the Atlantic. Taking account of the views of audiences, critics and academics, both at the time the film was released and in the years since, Kimber also looks at the changing political, social and economic contexts within which the film was produced and has subsequently circulated. *Henry* continues to represent a key film within the horror genre, the history of censorship, and the study of film violence. Kimber's account of the film's production and its fortunes in the marketplace provides a fascinating case study of film censorship in action, and offers a sustained and wide-ranging analysis of what remains one of the most disturbing films ever made. An excellent in-depth analysis... Kimber effectively combines close

readings of key scenes with detailed consideration of the history of different versions of Henry and its various engagements with critics, supporters and regulatory authorities.' Geoff King, Bournemouth University Shaun Kimber is a Senior Lecturer in the Media School at Bournemouth University.
