Therapeutic targeting of circulating tumor cells Apr 17 2020 There has been increased interest in circulating tumor cells (CTC), as a diagnostic readout of disease progression, and a tool for personalized medicine. The next generation of therapy for metastatic cancer may well involve neutralizing CTC as a means to prevent metastasis. In this topic we focus on recent research exploring this concept.

[Catalogue of the Ethiopic Manuscript Imaging Project 2](#) Sep 03 2021 The Catalog of the Ethiopic Manuscript Imaging Project (EMIP), volume 2, provides a full catalog for EMIP codex numbers 106 through 200, and magic scrolls 135 through 284. Each catalog entry for the codices provides a full physical description, a

listing of contents (with incipits), illuminations, varia (known works added later), notes on codicology and scribal practice, as well as a full quire map. Opening articles provide an introduction to the collection and its codicology, and an introduction to this set of Ethiopian scrolls of spiritual healing. Seven indices (general, works in the codices, names in the codices, miniatures in the codices, scribal practices, works in the scrolls, and names in the scrolls) provide quick access for researchers.

The Biology of Mammalian Spermatogonia Feb 14 2020

This book provides a resource of current understandings about various aspects of the biology of spermatogonia in mammals. Considering that covering the entire gamut of all things spermatogonia is a difficult task, specific topics were selected to provide foundational information that will be useful for seasoned researchers in the field of germ cell biology as well as investigators entering the area. Looking to the future, the editors predict that the foundational information provided in this book -- combined with the advent of new tools and budding interests in use of non-rodent mammalian models -- will produce another major advance in knowledge regarding the

biology of spermatogonia over the next decade. In particular, we anticipate that the core molecular machinery driving different spermatogonial states in most, if not all, mammals will be described fully, the extrinsic signals emanating from somatic support cell populations to influence spermatogonial functions will become fully known, and the capacity to derive long-term cultures of SSCs and transplant the population to regenerate spermatogenesis and fertility will become a reality for higher order mammals.

Operator's and Organizational Maintenance Manual for Teletypewriter Sets

AN/FGC-25, AN/FGC-25X, AN/FGC-26 ... AN/UGC-30 and AN/UGC-30X. Oct 04 2021

Data Science and Analytics (with Python, R and SPSS Programming) Nov 24 2020

The Book has been written completely as per AICTE recommended syllabus on "Data Sciences". SALIENT FEATURES OF THE BOOK: Explains how data is collected, managed and stored for data science. With complete courseware for understand the key concepts in data science including their real-world applications and the toolkit used by data scientists. Implement data collection and management. Provided with

state of the arts subjectwise. With all required tutorials on R, Python and Bokeh, Anaconda, IBM SPSS-21 and Matplotlib. *Bisexuality in the Lives of Men* Aug 02 2021 Explore the theoretical, political, psychological, and cultural issues surrounding male bisexuality! Bisexuality in the Lives of Men is the first anthology to focus on men who love both men and women. The theoretical, scientific, and literary essays in this landmark volume dispel the fictions that bisexual men are greedy, promiscuous, confused, deceptive, unfaithful, HIV-positive--the dominant images of bisexual men in our culture. Whether portrayed as a coward who can't quite come out into full gayness or a smooth-talking serial killer, the bisexual man has been vilified in books and movies. In scholarly studies, they are often ignored or else lumped together with gay men. It is now widely acknowledged that human sexuality is more complex and diverse than the narrow categories "gay" and "straight." But, while the use of the term "bisexual" has become much more common in the last decade, an understanding of bisexuality itself lags far behind. A lack of research on how bisexuality is experienced, interpreted, and encoded in literature, film, and other aspects of popular culture means that stereotypes, stigma, and confusion are still prevalent. Bisexuality in the Lives of Men is a multidisciplinary examination of this neglected topic, bringing together expertise

reflecting divergent approaches and fields to show the whole bisexual man. Topics include: a thoughtful review and analysis of the public health research on the role of bisexual men in HIV transmission a study of the marital consequences of a husband's bisexuality, including couples who have stayed together an analysis of the heartfelt discussions taking place in an online bi-male community an empirical study of the ways that bi-negativity differs from homophobia an essay bringing together queer theory and social constructionist ideas to explain why bisexual men are much less visible than bisexual women The rigorously analytical yet accessible essays in this volume offer new information and perspectives about male bisexuality. Bisexuality in the Lives of Men is an essential resource for anyone interested in the theoretical, political, and cultural issues of male bisexuality.

[Europe, What's in a Name](#) Sep 22 2020 Europe is a word that is almost daily on our lips. But how far do we have to go back in order to find the origins of its name? The first part of this beautifully illustrated book traces the geographical and mythological basis of Europe's name. Who came up with the idea to distinguish the world in continents with proper names? The search will bring the reader back to the early history of mankind. How did the ancient Egyptians see the world and populations around them? Where did the Hebrews get the idea to split the world in three? And what was the world-picture in ancient Greece, laid down in geographic treatises and fragments? Where did the name 'Europe' originate from? Could it be from a person,

either mortal or divine? In ancient Greek literature the name 'Europa' appears quite frequently for Greek goddesses and Greek women. Strangely enough, the best known Europa myth concerns a Phoenician princess, loved by the Greek god Zeus. Many mythographs doubt the Asian descent of the Phoenician Europa. Is her real origin to be located on mainland Greece? How can the contradicting Greek myths be interpreted, and was the name universally accepted as the name for the continent? In the second part of this book, the author tells the amazing story of how the Arts have treated the Europa myths for almost three millennia. He shows the extraordinary influence of the personification of the geographic continent Europe on literature, music, sculpture, painting, tapestry and other applied arts. All this clearly demonstrates the vivid interest in Europe for the subject throughout the ages and illustrates, according to Karel van Miert in his Foreword, our common European culture.

Earth Processes Oct 24 2020 Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 95. Publication of this monograph will coincide, to a precision of a few per mil, with the centenary of Henri Becquerel's discovery of "radiations actives" (C. R. Acad. Sci., Feb. 24, 1896). In 1896 the Earth was only 40 million years old according to Lord Kelvin. Eleven years later, Boltwood had pushed the Earth's age past 2000 million years, based on the first U/Pb

chemical dating results. In exciting progression came discovery of isotopes by J. J. Thomson in 1912, invention of the mass spectrometer by Dempster (1918) and Aston (1919), the first measurement of the isotopic composition of Pb (Aston, 1927) and the final approach, using Pb-Pb isotopic dating, to the correct age of the Earth: close-2.9 Ga (Gerling, 1942), closer-3.0 Ga (Holmes, 1949) and closest-4.50 Ga (Patterson, Tilton and Inghram, 1953).

Bulletin Jul 01 2021

Statics and Analytical Geometry Aug 22 2020 This book talks about the traditional subjects of Euclidean, relative and projective geometry in two and three measurements, including the order of conics and quadrics, and geometric changes. These subjects are imperative both for the scientific establishing of the understudy and for applications to different subjects. They might be contemplated in the principal year or as a moment course in geometry. The material is exhibited geometrically, and it means to build up the geometric instinct and thinking about the understudy, and in addition his capacity to comprehend and give numerical evidences. Direct polynomial math isn't an essential, and is kept to an absolute minimum. The book incorporates a couple of methodological curiosities, and a substantial number of

activities and issues with arrangements. Particularly composed as an incorporated study of the improvement of diagnostic geometry, this great investigation adopts a one of a kind strategy to the historical backdrop of thoughts.

Problems in Physical

Chemistry JEE Main and

Advanced Volume 2 Feb 25

2021 1. The book is prepared for the problem solving in chemistry 2. It is divided into 5 chapters 3. Each chapter is topically divided into quick theory, Immediate Test and Knowledge Confirmation Test 4. At the end of the each chapter cumulative exercises for JEE Main & Advanced for practice 5. 'Acid Test for JEE

Mains & Advance' containing all types of questions asked in JEE A common phrase among JEE Aspirants that chemistry is the most scoring subject, but the problems asked in JEE Exams are not directly related but they are based on multiple applications. Introducing the all new edition of "Problem Physical Chemistry JEE Main & Advanced Volume - 2" which is designed to develop the use of the concepts of chemistry in solving the diversified problems as asked in JEE. The book divides the syllabus into 5 chapters and each chapter has been topically divided in quick theory, different types of Solved Examination, followed by 'Immediate Test' along with

the Topicwise short exercises 'Knowledge Confirmation Test'. At the end of each chapter there are separate cumulative exercises for JEE Main & Advanced, 'Acid Test for JEE Mains & Advance' are also provided containing all types of questions asked in JEE. Detailed and explanatory solutions provided to all the questions for the better understanding. TOC Solid State, Solution and Colligative Properties, Electrochemistry, Chemical Kinetics, Surface Chemistry
