Wall to Wall: Law as Culture in Latin America and Spain Dec 14 2019 'Wall to Wall: Law as Culture in Latin America and Spain' comprises interventions from a wide array of scholars based in the US, Spain, and Latin America, exploring the encounter of Hispanophone cultures and the law. Its contributors delineate a fraught relationship of complicity, negotiation, and outright confrontation covering five centuries and a truly global landscape, from Inquisitorial processes at the onset of the Spanish Empire to last-ditch plans to preserve it in the 19th century Philippines, to the challenges to contemporary articulations of the nation-state in Catalonia. Beyond single, specialized time-period and national cultures, 'Wall to Wall' embraces and showcases the heterogeneity of the field, covering both well-known territory (Argentina, Mexico, Spain) and often-neglected cultures (Venezuela, Philippines, and indigenous communities in the Yucatan area), as well as problems that cannot be narrowed down to the nation-state (exile, independence processes, non-state laws, translation of foreign cultures). Contributors include: Aurélie Vialette, Daniel Aguirre-Oteiza, Daniela Dorfman, María Fernanda Lander, Gloria Elizabeth Chacón, Iván Trujillo, Benjamin Easton, Pauline de Tholozany, Lauren G.J. Reynolds, Ignasi Gozalo-Salellas, and Gabriela Balcarce. The chapters included foreground the conceptual diversity of the field, in dialogue

with issues in literary and visual culture, (post-)colonialism, race, nationalism, gender, and class. Not only do they place vernacular objects in dialogue with current international concepts and methods, but these essays also aim to advance an autonomous conceptual and theoretical work-based approach. Its chapters aspire to enter a global discussion around the state-centered aspiration to shape culture and the many literary and cultural practices that escape it; researchers of those issues and Latin American and Iberian studies will find new venues to rethink their global archive.

Spanish Romanticism and the Uses of History _____ Dec 06
2021 Other matters considered include the medieval revival, the rejection of Enlightenment formulae, the fear of an absent but psychologically potent Revolution, Romantic diagnoses of nineteenth-century reality within the prism of the 'Two Spains', and the entailments of Romantic literary history and its construction of a casticista cultural identity."--Jacket.

Honor and Violence in Golden Age Spain Feb 25 2021
Early modern Spain has long been viewed as having a culture obsessed with honor, where a man resorted to violence when his or his wife's honor was threatened, especially through sexual disgrace. This book--the first to closely examine honor and interpersonal violence in the era--overturns this idea, arguing that the way Spanish men and women actually behaved was very different from the behavior depicted in dueling manuals, law books, and honor plays of the period. Drawing on criminal and other records to assess the character of violence among non-elite Spaniards, historian Scott K. Taylor

finds that appealing to honor was a rhetorical strategy, and that insults, gestures, and violence were all part of a varied repertoire that allowed both men and women to decide how to dispute issues of truth and reputation.

Uniform Rules for European Contract Law? Dec 26 2020 Over the last 30 years, the evolution of *acquis communautaire* in consumer law and harmonising soft law proposals have utterly transformed the landscape of European contract law. The initial enthusiasm and approval for the EU programme has waned and, post Brexit, it currently faces increasing criticism over its effectiveness. In this collection, leading academics assess the project and ask if such judgements are fair, and suggest how harmonisation in the field might be better achieved. This book looks at the uniform rules in the context of: the internal market; national legislators and courts; bridging the gap between common and civil law; and finally their influence on non-member states. Critical and rigorous, it provides a timely and unflinching critique of one of the most important fields of harmonisation in the European Union.

Perspectives on the Family in Spain, Past and Present Apr 10 2022 This is the first comprehensive study of family life throughout Spain between 1700 and 1970. Using local and aggregate source material, David Reher builds upon the growing interest of historians and social scientists in the study of the family, and its importance for the demographic, social, and economic reproduction of society. The study adopts methodological approaches from a number of disciplines and encompasses the great regional and local complexity characteristic of Spanish society both now and in the past. The family is considered as a dynamic decision-making unit intent on securing maximum benefit for its members, though the success of this strategy is contingent on the prevailing social, demographic, economic, and cultural realities. Key subjects considered include co-residence patterns, family systems, family demography, family economies, kinship networks, marriage markets, infant care, the elderly, the limits of vulnerability, and the individual life-course.

Treatise on International Criminal Law

Mar 09 2022

International criminal law and justice is a flourishing field which has led, in recent years, to new international criminal tribunals and new mechanisms for investigation and holding criminals to account. These developments have, in turn, led to an increasing volume and greater consolidation of case law, and even more scholarly attention. The second edition of this volume of Kai Ambos' seminal treatise has been revised and rewritten in parts to provide coverage of recent developments in the 'Special Part' of international criminal law: namely, the specific crimes and sentencing. Amongst other updates, there are significant extensions of the discussion on sexual and gender-based crimes; the introduction of environmental crimes into international criminal law; further elaboration on the nexus requirement in war crimes and asymmetrical conflicts (e.g., ISIS); and reference to the newly introduced war crimes of the ICC Statute and of the peculiarities of cyber-attacks and other emerging activities. The volume complements Volume I of the treatise on issues relevant to the foundations, general part of international criminal law, and general principles of international criminal justice. Taken together with the other new editions of the three-volume series, this second edition provides an exhaustive guide to every aspect of international criminal law, from fundamental principles to procedures and implementation. Kai Ambos' Treatise remains an indispensable reference work for academics and practitioners of

international criminal law.

Histories of Infamy Aug 22 2020 "Roa-de-la-Carrera convincingly shows that Gómara, as well as other historians in the period, cannot easily ignore nor erase the contradictions of the Spanish colonial project." - Luis Fernando Restrepo, University of Arkansas "In an eloquent and thorough exegesis, Roa-de-la-Carrera reveals how and why López de Gómara, having written the best of all possible books in exultation of Spanish imperialism, nevertheless failed to convince the readers of his time." - Susan Schroeder, Tulane University In Histories of Infamy, Cristián Roa-de-la-Carrera explores Francisco López de Gómara's (1511-ca.1559) attempt to ethically reconcile Spain's civilizing mission with the conquistadors' abuse and exploitation of Native peoples. The most widely read account of the conquest in its time, Gómara's *Historia general de las Indias y Conquista de México* rationalized the conquistadors' crimes as unavoidable evils in the task of bringing "civilization" to the New World. Through an elaborate defense of Spanish imperialism, Gómara aimed to convince his readers of the merits of the conquest, regardless of the devastation it had wrought upon Spain's new subjects. Despite his efforts, Gómara's apologist text quickly fell into disrepute and became ammunition for Spain's critics. Evaluating the effectiveness of ideologies of colonization, Roa-de-la-Carrera's analysis will appeal to scholars in colonial studies and readers interested in the history of the Americas.

Handbook of Recycled Concrete and Demolition Waste

May 11 2022 The civil engineering sector accounts for a significant percentage of global material and

energy consumption and is a major contributor of waste material. The ability to recycle and reuse concrete and demolition waste is critical to reducing environmental impacts in meeting national, regional and global environmental targets. Handbook of recycled concrete and demolition waste summarises key recent research in achieving these goals. Part one considers techniques for managing construction and demolition waste, including waste management plans, ways of estimating levels of waste, the types and optimal location of waste recycling plants and the economics of managing construction and demolition waste. Part two reviews key steps in handling construction and demolition waste. It begins with a comparison between conventional demolition and construction techniques before going on to discuss the preparation, refinement and quality control of concrete aggregates produced from waste. It concludes by assessing the mechanical properties, strength and durability of concrete made using recycled aggregates. Part three includes examples of the use of recycled aggregates in applications such as roads, pavements, high-performance concrete and alkali-activated or geopolymer cements. Finally, the book discusses environmental and safety issues such as the removal of gypsum, asbestos and alkali-silica reaction (ASR) concrete, as well as life-cycle analysis of concrete with recycled aggregates. Handbook of recycled concrete and demolition waste is a standard reference for all those involved in the civil engineering sector, as well as academic researchers in the field. Second Language Acquisition Abroad Jun 12 2022 This volume brings together for the first time a collection of studies devoted to missionary language learning and retention. Introductory chapters provide historical perspectives on this population and on language teaching philosophy and practice in the LDS tradition. The empirical studies which follow are divided into two sections, the first examining mission language acquisition by English-speaking missionaries abroad, the second focusing on post-mission language attrition. These chapters by internationally known scholars offer cutting-edge research using a number of different target languages in addressing various issues in second language development. Finally, a comprehensive bibliography of sources on mission languages is included. The readership of this pioneering work is expected to extend beyond specialists in study abroad and missionary language training to a broader audience of applied linguists, educators, and students interested in language acquisition and attrition. In addition, the book offers useful insights to adults who want to maintain a second language.

The Concept of Genocide in International Criminal Law Oct 24 2020 This book presents a review of historical and emerging legal issues that concern

the interpretation of the international crime of genocide. The Polish legal expert Raphael Lemkin formulated the concept of genocide during the Nazi occupation of Europe, and it was then incorporated into the 1948 Convention on the Prevention and Punishment of the Crime of Genocide. This volume looks at the issues that are raised both by the existing international law definition of genocide and by the possible developments that continue to emerge under international criminal law. The authors consider how the concept of genocide might be used in different contexts, and see whether the definition in the 1948 convention may need some revision, also in the light of the original ideas that were expressed by Lemkin. The book focuses on specific themes that allow the reader to understand some of the problems related to the legal definition of genocide, in the context of historical and recent developments. As a valuable contribution to the debate on the significance, meaning and application of the crime of genocide the book will be essential reading for students and academics working in the areas of Legal History, International Criminal Law, Human Rights, and Genocide Studies.

Multidisciplinary Approaches to Code Switching
18 2022 The volume presents a selection of contributions by leading scholars in the field of code-switching. In the past the phenomenon of code-switching was studied within different subfields of linguistics and they all took their own perspectives on code-switching without taking into account findings from other subdisciplines. This book raises a question of a much broader multidisciplinary approach to studying the phenomenon of code-switching; calls for integration of disciplines; and illustrates how frameworks from one subfield can be applied to models in another. The volume includes survey chapters, empirical studies, contributions that use empirical data to test new hypotheses about code-switching, or suggest new approaches and models for the study of code-switching, and chapters that discuss principles and constraints of code-switching, and code-switching vs. transfer. The book is easily accessible to anyone who is interested in the phenomenon of code-switching in bilinguals.

Optimization for Decision Making II Jul 13 2022 In the current context of the electronic governance of society, both administrations and citizens are demanding the greater participation of all the actors involved in the decision-making process relative to the governance of society. This book presents collective works published in the recent Special Issue (SI) entitled "Optimization for Decision Making II". These works give an appropriate response to the new challenges raised, the decision-

making process can be done by applying different methods and tools, as well as using different objectives. In real-life problems, the formulation of decision-making problems and the application of optimization techniques to support decisions are particularly complex and a wide range of optimization techniques and methodologies are used to minimize risks, improve quality in making decisions or, in general, to solve problems. In addition, a sensitivity or robustness analysis should be done to validate/analyze the influence of uncertainty regarding decision-making. This book brings together a collection of inter-/multi-disciplinary works applied to the optimization of decision making in a coherent manner.

Contract Law in Spain ____ Feb 14 2020 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Spain covers every aspect of the subject – definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion

of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Spain will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.

European Capital Markets Law Nov 12 2019 European capital markets law has developed rapidly in recent years. The former directives have been replaced by regulations and numerous implementing legal acts aimed at ensuring a level playing field across the EU. National experiences in selected Member States – Austria, France, Germany, Italy, Spain, Sweden and the United Kingdom – are also explored. The first chapter deals with the foundations of capital markets law in Europe, the second explains the basics, and the third examines the regime on market abuse. Chapter four explores the disclosure system and chapter five the roles of intermediaries, such as financial analysts, rating agencies and proxy advisers. Short selling and high frequency trading is described in chapter six. Chapter seven deals with financial services and chapter eight explains compliance and corporate governance in investment firms. Chapter nine illustrates the regulation of benchmarks. Finally, chapter ten deals with public takeovers. Reflection in Sequence Sep 15 2022 The codes of conduct imposed on females by Spain's dictator Francisco Franco after the Spanish Civil War (1936-39) created a stifling environment for women until his death in 1975. Beginning with Carmen Laforet's 1944 Nadal Prize-winning novel *Nada*, novels by women - many of which explore female identity - began to proliferate in Spain. The works examined in this study - *Nada*, *Primera memoria* (1960) by Ana Maria Matute, *La placa del Diamant* (1962) by Merce Rodoreda, *Julia* (1969) by Ana Maria Moix, *El cuarto de atras* (1978) by Carmen Martin Gaité, *El amor es un juego solitario* (1979) by Esther Tusquets, and *Questio d'amor propi* (1987) by Carme Riera - feature female protagonists struggling for self-realization and, by extension, for change in a restrictive Spanish society. Schumm's analysis of the seven novels demonstrates how examination of metaphoric tropes and mirror images provides insight into the protagonists' development.

The Future of Contract Law in Latin America Jan 19 2023 This book presents, analyses and evaluates the Principles of Latin American Contract Law (PLACL), a recent set of provisions aiming at the harmonisation

of contract law at a regional level. As such, the PLACL are the most recent exponent of the many proposals for transnational sets of 'principles of contract law' that were drafted or published over the past 20 years, either at the global or the regional level. These include the UNIDROIT Principles of International Commercial Contracts, the Principles of European Contract Law, the (European) Draft Common Frame of Reference and the Principles of Asian Contract Law. The PLACL are the product of a working group comprising legal academics from Argentina, Brazil, Colombia, Chile, Paraguay, Uruguay and Venezuela. The 111 articles of the instrument deal with problems of general contract law, such as formation, interpretation and performance of contracts, as well as remedies for breach. The book aims to introduce the PLACL to an international audience by putting them in their historical and comparative context, including other transnational harmonisation measures and initiatives. The contributions are authored by drafters of the PLACL and contract law experts from Europe and Latin America.
