To Be Fair Jul 15 2022 What does it mean to be fair? Why do we feel unfairness so strongly? What has happened to us today that we spend more time condemning each other's views than giving each other a fair hearing? The idea of fairness is one of the most commonly-expressed concepts, not only in English but many other languages, yet nobody ever stops to think what it really means. We all simply take the word 'fair' for granted. In this polemical guide to fairness, Ben Fenton explains the meaning of the word, how it fits into our genetic make-up within the deepest recesses of our brains and why we need our innate sense of fair play now more than ever. Fenton explores the idea that the unconscious procedure that humans go through in deciding fairness is the vital balancing act between competition and cooperation, the two driving forces that have made us the super-species of Planet Earth. He describes the neurology, anthropology, psychology, history and future of fairness and looks at how it affects our lives through politics, law, sex, religion, race, sport, business and even war. As a reporter of thirty years' experience, Fenton brings all his skills to bear in a lively and challenging description of the profound inner meaning of a throwaway phrase and why it matters so much to every single person in the world to seek *To Be Fair*.

The Art of War for Women Mar 19 2020 Forget everything you think you know about strength, strategy and success. This brilliant adaptation of the ancient masterpiece The Art of War shows women how to use Sun Tzu’s philosophy to win in every aspect of life. Would you like to transform your weaknesses into strengths? Succeed at work without compromising your ethics? Integrate your style and personal philosophy into every action you take? If so, this book is for you. In The Art of War for Women, bestselling author Chin-Ning Chu brings the eternal wisdom of philosopher-general Sun Tzu to women looking to gain a better understanding of who they are--and, more importantly, who they want to be. Although Sun Tzu’s book is about the application of strategies and determining the most efficient way of gaining victory with the least amount of conflict, every one of those strategies begins with having a deep understanding of the people and the world around us. They also require us to understand ourselves--our strengths and weaknesses, our goals and fears. In other words, the aim is not to apply a series of rules coldly and dispassionately, but rather to integrate ourselves and our unique talents into the strategies we will employ. This is not a feel-good book. (But you will feel good after reading it.) It is not a motivational book. (But you will be motivated to achieve what you want, once you are done.) Ultimately, its purpose is to provide women with the strategies we all need to overcome the obstacles that stand in the way of our goals and dreams. Sun Tzu’s Art of War is the most influential book on strategy ever published, selling tens of millions of copies worldwide in several editions. Written by one of today’s foremost authorities on Sun Tzu, The Art of War for Women is sure to become a classic in its own right.

Think for Yourself Oct 18 2022 Middle school is a time of change, when things begin to look different and assumptions start to be questioned, and today more than ever it's tough to know what to believe. This unique and timely book won't tell you what to think—that's up to you!—but it will show you how to think more deeply about your own life and current events. Covering a wide range of subjects affecting the world today, including human and animal rights, social media, cyber bullying, the refugee crisis, and more, THINK FOR YOURSELF will help you to learn how to ask questions, analyze evidence, and use logic to draw conclusions, so you can solve problems and make smart decisions. Each chapter of the book covers one key step in the critical thinking process, and includes a real-world example to help convey the importance and relevance of every step: Ask Questions: If you want to be a critical thinker, it helps to be curious. It's normal to wonder about the world around us. Some questions are big, and some are small. Sometimes questions can spark debate and argument. All critical thinking starts with at least one question. Gather Evidence: First, find information—from making observations to interviewing experts to researching a topic online or in books. Then make connections and draw conclusions. Evaluating Evidence: Smart thinkers evaluate the importance, accuracy and relevancy of the information they gather. Getting Curious: Consider other points of view, examine your own point of view, understand the power of emotion, and practice empathy. Draw Conclusions: The final step in the critical thinking process, this is based on reason and evidence. Revisit your original question, review the evidence and what you've learned, and consider your values. And remember: critical thinking doesn't stop when you've reached a decision. Learn how to discuss and debate other points of view. Then keep growing. Sometimes you might change your mind—that's OK, too!
