**Cases, Problems, and Materials on Contracts** May 25 2020 Buy a new version of this Connected Casebook and receive access to the online e-book, practice questions from your favorite study aids, and an outline tool on CasebookConnect, the all in one learning solution for law school students. CasebookConnect offers you what you need most to be successful in your law school classes—portability, meaningful feedback, and greater efficiency. Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs. Although it starts with “Agreement” and moves to “Consideration,” it is also designed for teachers who prefer to begin with “Consideration” or “Remedies.” It can be used in courses that both include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit from: Coverage of the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented The entire book’s approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms. CasebookConnect features: ONLINE E-BOOK Law school comes with a lot of reading, so access your enhanced e-book anytime, anywhere to keep up with your coursework. Highlight, take notes in the margins, and search the full text to quickly find coverage of legal topics. PRACTICE QUESTIONS Quiz yourself before class and prep for your exam in the Study Center. Practice questions from Examples & Explanations, Emanuel Law Outlines, Emanuel Law in a Flash flashcards, and other best-selling study aid series help you study for exams while tracking your strengths and weaknesses to help optimize your study time. OUTLINE TOOL Most professors will tell you that starting your outline early is key to being successful in your law school classes. The Outline Tool automatically populates your notes and highlights from the e-book into an editable format to accelerate your outline creation and increase study time later in the semester. The purchase of this Kindle edition does not entitle you to receive access to the online e-book, practice questions from your favorite study aids, and outline tool available through CasebookConnect.

**Potter v. Shrackle and The Shrackle Construction Company** Mar 23 2020 An inattentive moment costs a woman her life—the question is, which party wasn’t paying attention?; Charles Shrackle's truck strikes and kills Katherine Potter as she is crossing the street in Nita City. In the wrongful death action brought by her estate, the plaintiff claims Shrackle failed to yield to Katherine Potter as she crossed in the crosswalk. Shrackle claims that Mrs. Potter stepped out in front of his truck from the median, well away from the crosswalk. Conflicting eyewitnesses support both versions of the accident. This classic file is ideal for teaching basic trial skills. It has been updated to include social media exhibits and text messages, but the basic questions remain. Was Katherine Potter crossing in a crosswalk? Was the accident caused by the use of a cell phone? Was Jeffrey Potter involved in an affair when his wife died? There are six witnesses for the plaintiff and four witnesses for the defendants.; The revised Seventh Edition now has four versions: Trial, Faculty, Plaintiff and Defendant. Revision based on the original file created by Kenneth S. Broun and James H. Seckinger.;

*Excavation* Aug 20 2022 Excerpt from *Excavation: Machinery Methods and Costs; Including a Revision of "Excavating Machinery"* A noteworthy development in the field of excavating machinery has taken place since the publication of the book, *Excavating Machinery* in 1913. The author has received so many requests for information concerning the more recent types of excavators and the newer uses of older types, that it has seemed desirable to present this work. The new book embodies some of the material of the former work, but is entirely re-cast and largely re-written. The new text has two general divisions; the first comprising a description of the construction, method and typical cost of Operation of each type of excavator, and the second embodying a comparative study of the efficient and economic use of the different types of machines in the various fields of construction work. The author has endeavored to describe the makes and types of excavators commonly used in all classes of work. He has not attempted to describe or even mention every make of excavator, but every type has been treated in sufficient detail to give a clear idea of its construction and field of work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

**A Career as a Pipelayer** Oct 22 2022 Pipelayers make an invaluable contribution to building projects large and small, playing a pivotal role in developing and refurbishing our national infrastructure. This book shows young readers how they can explore this fascinating and fulfilling subset of contracting, building a career from the ground up. Combining valuable industry data, engaging on-the-job imagery and potential scenarios, as well as safety and job-seeking tips, this book gives handy students a great glimpse at a trade and field often underrepresented in youth-oriented career training.

*Excavating Contractor* Feb 26 2023

**Deep Excavations** Jun 18 2022 “This book assembles the practical rules and details for the efficient and economical execution of deep excavations. It draws together a wealth of experience of both design and construction from published work and the lifetime practice of the author. This second edition is extensively revised to include changes in design emphasis including those due to Eurocode 7 and descriptions of the latest equipment, construction

techniques and geotechnical processes. Additional details include those of the latest piling and diaphragm wall equipment and innovations in top-down construction applied to basements and cut-and-cover works. The section on caissons has been expanded to include design methods."--BOOK JACKET.

**Front End Loader Excavation Machine Construction Equipment Journal** Apr 16 2022 A life worth living is worth recording, and what better place than this journal? These lined pages crave your scribbled notes, thoughts, ideas, experiences, and notions. Fill the lines, remember your life, don't lose your ideas, and keep reaching higher to live the best life you can. It all starts here, folks, but you'll need your own pen or pencil. Write on!

**Construction Technology of Large Diameter Underwater Shield Tunnel** Aug 08 2021 This book systematically introduces the new technology used in the construction of underwater large slurry shields under complex conditions. The basic principles, scope of application, construction technology and technical points of the key technologies such as the origin and arrival of the shield, crossing the shallow soil in the middle of the river, crossing the guard, and changing the knife and opening the knife are clarified.

**Mechanics of Poroelastic Media** Feb 02 2021 In *Mechanics of Poroelastic Media* the classical theory of poroelasticity developed by Biot is developed and extended to the study of problems in geomechanics, biomechanics, environmental mechanics and materials science. The contributions are grouped into sections covering constitutive modelling, analytical aspects, numerical modelling, and applications to problems. The applications of the classical theory of poroelasticity to a wider class of problems will be of particular interest. The text is a standard reference for researchers interested in developing mathematical models of poroelasticity in geoenvironmental mechanics, and in the application of advanced theories of poroelastic biomaterials to the mechanics of biomaterials.

**Shield Construction Techniques in Tunneling** Sep 28 2020 *Shield Construction Techniques in Tunneling* presents the latest on this fast, environmentally-friendly and relatively safe construction technique, reflecting on its technical risks and challenges as seen in China. Sections introduce the type of shields, the history of the technique, shielding principles, selection, management, the latest techniques in operation, consider engineering cases, discuss construction in gravel, soft-soil, composite, and rock strata, and present video clips of construction that are accessible through QR codes embedded in the text. The book combines theory and practical experience, giving the reader unique insights into shield equipment and construction techniques. The shield tunneling technique is being used very widely, particularly in China, which is building urban-rail transit systems at an unparalleled scale and speed. The use of tunneling-shields provides a fast, relatively-safe, and ecologically-friendly method for the construction of tunnels. However, a number of incidents have shown the risks involved in tunnelling through geologically complex areas. Gives the principles and practice of shield construction techniques, including shield selection and operation Demonstrates the latest technologies in shield construction that can be applied in practice Reflects on the technical risks and challenges of shield construction, based on extensive use of the technique for tunnel construction in China Discusses challenges in construction in gravel, soft-soil, composite and rock strata Provides engineers with applicable insights into shield equipment and construction techniques

**American Directory of Writer's Guidelines** Feb 14 2022 Perhaps the best-kept secret in the publishing industry is that many publishers--both periodical publishers and book publishers--make available writer's guidelines to assist would-be contributors. Written by the staff at each publishing house, these guidelines help writers target their submissions to the exact needs of the individual publisher. "'The American Directory of Writer's Guidelines'" is a compilation of the actual writer's guidelines for more than 1,700 publishers. A one-of-a-kind source to browse for article, short story, poetry and book ideas.

**Prediction and Control of Interaction Between Ground Building and Tunnel Construction Process** Jul 27 2020 This book covers tunnel construction and building construction and design. It has two parts. Part one is for the engineering practice of the subway tunnel through the base of the building in typical geological conditions, to study the mechanism and law of building damage caused by stratum deformation by in-situ monitoring, numerical simulation and theoretical analysis methods. At the same time, the risk management of subway tunnel through the bottom of the building is discussed. Second part, in view of the excavation and unloading of the foundation pit and the main structure loading in the process of high-rise building construction, discusses optimization of the construction scheme, systematic evaluation of the safety of the existing tunnel and control measures combined with the engineering practice. This book provides a valuable contribution to the field of tunnel construction and design and construction of building for both the engineering experts and graduate students as well.

**Engineer and Contract** Feb 20 2020

**The Excavating Engineer** Dec 24 2022

**Contracts** Jun 25 2020 *Contracts: Cases and Doctrine* features a mix of lightly-edited classic and contemporary cases that stresses current contract doctrine along with the essential lawyering skill of case analysis—how to sift through the facts of the case to discern the prevailing rules and theory. Randy Barnett and Nate Oman's innovative text introduces each case and provides the historical background of the iconic cases that make the study of contract law engaging. Study Guide questions help students identify salient issues as they read each case. Judicial biographies of each judge provide additional context. The Seventh Edition has been edited to delete materials that are seldom covered in a 1L class. This edition adds new cases that have been chosen for their topicality, facts, or pedagogical usefulness. New areas covered include so-called "smart contracts" and the relationship between restitution and contract. As always, we have tried to focus on cases with facts that will be easier to teach. New cases in this edition include a contract with a spy that turns out to be a double agent for the KGB, the effect of pandemics on contractual obligations, the gambling shenanigans of a royal prince, and emotional support animals. New to the Seventh Edition: In order to keep the size of the book manageable, we have eliminated the section on the signature requirement under the statute of frauds and have slimmed down the materials on internet contracting, which is no longer the "cutting edge" area that once it was. New cases include: Attorney General v. Blake (restitution damages for breach of contract against a British spy who defected to the USSR) *Snepp v. United States* (squib) (constructive trust against an American spy for breach of contract) *Al-Ibrahim v. Edde* (denied an unjust enrichment remedy to unwind a contract declared unenforceable for illegality) *Pelletier v. Johnson* (claim for unjust enrichment allowed to unwind a contract declared unenforceable for illegality) *Carter Baron Drilling v. Badger Oil Corp.* (discussing the parole evidence rule under the UCC) *C.R. Klewin Inc. v. Flagship Properties, Inc.* (the exception to the 1-year requirement under the statute of frauds) *Cohen v. Clark* (case imposing liability on a breaching party that everyone agrees breached in "good faith"; illustrates the strictness of contractual liability) *Hanford v. Connecticut Fair Ass'n, Inc.* (public policy exception for public health in time of a pandemic) *B2C2 Ltd v. Quoine Ltd Pte* (unilateral mistake case dealing with "smart contracts") Professors and student will benefit from: Case-based approach that gives students ample doctrinal materials to sift through for facts and analyze for prevailing rules and theory. Cases that are lightly edited, or presented as whole as possible, to give first-year students the opportunity to develop case-analysis skills. Restatement and UCC sections integrated to encourage students to consult them as they read the cases. Iconic and contemporary cases combined to show how the classic cases are still relevant. Chapters that begin with a brief, accessible textual introductions. Study Guide questions before each case help focus student attention on salient issues. Flexible organization begins with Remedies, but chapters can be taught in any order.

*Geotechnical Aspects of Underground Construction in Soft Ground* Nov 23 2022 Geotechnical Aspects of Underground Construction in Soft Ground comprises a collection of 112 papers, four general reports on the symposium themes, the Fujita Lecture, three Special Lectures and the Bright Spark Lecture presented at the Tenth International Symposium on Geotechnical Aspects of Underground Construction in Soft Ground, held in Cambridge, United Kingdom, 27-29 June 2022. The symposium is the latest in a series which began in New Delhi in 1994, and was followed by symposia in London (1996), Tokyo (1999), Toulouse (2002), Amsterdam (2005), Shanghai (2008), Rome (2011), Seoul (2014) and Sao Paulo (2017). This was organised by the Geotechnical Research Group at the University of Cambridge, under the auspices of the Technical Committee TC204 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). Geotechnical Aspects of Underground Construction in Soft Ground includes contributions from more than 25 countries on research, design and construction of underground works in soft ground. The contributions cover: Field case studies Sensing technologies and monitoring for underground construction in soft ground Physical and numerical modelling of tunnels and deep excavations in soft ground Seismic response of underground infrastructure in soft ground Design and application of ground improvement for underground construction Ground movements, interaction with existing structures and mitigation measures The general reports give an overview of the papers submitted to the symposium, covered in four technical sessions. The proceedings include the written version of the five invited lectures covering topics ranging from developments in geotechnical aspects of underground construction, tunnelling and groundwater interaction (short and long-term effects), the influence of earth pressure balance shield tunnelling on pre-convergence and segmental liner loading (field observations, modelling and implications on design). Similar to previous editions, Geotechnical Aspects of Underground Construction in Soft Ground represents a valuable source of reference on the current practice of analysis, design, and construction of tunnels and deep excavations in soft ground. The book is particularly aimed at academics and professionals interested in geotechnical and underground engineering.

**Geotechnical Aspects of Underground Construction in Soft Ground. 2nd Edition** Jan 25 2023 GEOTECHNICAL ASPECTS OF UNDERGROUND CONSTRUCTION IN SOFT GROUND comprises a collection of 112 contributions presented at the Tenth International Symposium on Geotechnical Aspects of Underground Construction in Soft Ground, held in Cambridge, United Kingdom, 27-29th June 2022. This 2nd edition also includes four general reports on the symposium themes which give an overview of the papers submitted to the symposium, covered in four technical sessions. The symposium is the latest in a series which began in New Delhi in 1994, and was followed by symposia in London (1996), Tokyo (1999), Toulouse (2002), Amsterdam (2005), Shanghai (2008), Rome (2011), Seoul (2014) and Sao Paulo (2017). This symposium was organised by the Geotechnical Research Group at the University of Cambridge, under the auspices of the Technical Committee TC204 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). Geotechnical Aspects of Underground Construction in Soft Ground includes contributions from more than 25 countries on the research, design and construction of underground works in soft ground. The contributions cover the following themes: Field case studies Sensing technologies and monitoring for underground construction in soft ground Physical and numerical modelling of tunnels and deep excavations in soft ground Seismic response of underground infrastructure in soft ground Design and application of ground improvement for underground construction Ground movements, interaction with existing structures and mitigation measures Similar to previous editions, GEOTECHNICAL ASPECTS OF UNDERGROUND CONSTRUCTION IN SOFT GROUND represents a valuable source of reference on the current practice of analysis, design, and construction of tunnels and deep excavations in soft ground. The book is particularly aimed at academics and professionals interested in geotechnical and underground engineering.

*Be Your Own Contractor and Save Thousands* Jan 01 2021 Consumers who are building or renovating their homes can save substantial time and money simply by contracting the work themselves. This guide will help homeowners obtain permits, develop plans and specifications, and check work. Even if they choose to hire a general contractor, this handbook will help consumers knowledgeably oversee the project.

*Frontiers in Civil and Hydraulic Engineering, Volume 1* Jul 07 2021 Frontiers in Civil and Hydraulic Engineering focuses on the research of architecture and hydraulic engineering in civil engineering. The proceedings feature the most cutting-edge research directions and achievements related to civil and hydraulic engineering. Subjects in the proceedings including: Engineering Structure Intelligent Building Structural Seismic Resistance Monitoring and Testing Hydraulic Engineering Engineering Facility The works of this proceedings can promote development of civil and hydraulic engineering, resource sharing, flexibility and high efficiency. Thereby, promote scientific information interchange between scholars from the top universities, research centers and high-tech enterprises working all around the world.
