To a fish or a bird, it's a bad thing. But to an indie author, it's a good thing. Out there online, there are people who will be your net as you learn how to publish. I'm talking about the kind of net that keeps acrobats from squishing when they miss that swing or those hands high up there in the air. But my biggest piece of advice is to concentrate on finding other Christians. Some of the earliest messages are to persons in Scotland and the United Kingdom, because of the September 2014 Scotland Independence Referendum, to note the argument in "America the Great" concerning the legal and practical possibility of joining the United States rather than the European Union. Several of the messages – the longest ones – are to professors and experts in the fields of political science and law in non-United States countries – especially in countries threatened by the current government of mainland China, including Taiwan, South Korea, Japan, the Philippines, and Australia. As he neared the end of the process of drafting these, it occurred to the author that a collection of the messages could be of interest to the general world-wide public. The message to the Philippines, which closes this collection, is perhaps the most important, due to its discussion of naval military issues, and ought also to be read by Australians as if directed to them. New Zealanders should consider the Australian and Philippines messages as also directed to them. The author has added a 27 page addendum concerning the sources of his assertion of expertise in military and diplomatic strategy. This addendum is original material not in "America the Great" and not included in any of the messages. How do evangelism and social concern relate to one another in the mission of the church? How should the Old Testament's emphasis on social justice inform the praxis of modern believers? Does the Bible emphasize individual salvation, or does it teach a broader, more inclusive concept? Theologians, missiologists, pastors, and educators have wrestled with these questions for centuries. But especially since the early part of the twentieth century, this debate has increasingly become a point of contention among evangelical Christians, with few indications that a consensus may soon be forthcoming. Yet few have offered so thorough an answer to these questions as has Carl F. H. Henry. Henry's regenerative model of evangelism and social concern stands on the shoulders of Augustine and many others, and offers what may be the best way forward. This book explores Henry's thoughts on this subject and sets him in dialogue with numerous others who have written on these topics. Thus it will prove a valuable resource for all interested in this topic. So, you have your Kindle and are ready to start reading. Great! But did you know that you can play music on the Kindle while you are reading that new bestselling novel? How about sharing your thoughts about the book with friends via Facebook and Twitter? More than just an e-reader, Amazon's popular device lets you do those things and much more. You can create a custom calendar to help plan your day or remember your mom's birthday, calculate the tip at your favorite restaurant, and waste a little time and have fun playing games or surfing the web. It is of great importance to be a writer because we can only communicate our thoughts to a greater audience through writing. This is absolutely my belief as a writer. I began writing in 2002 when in the village and many people decided to discourage me to read and write, but it was really my desire to write and because of this, no one can stop me from writing. I wrote on exercise books because I did not have a computer at that time and I never heard about computers either leave alone how to use them. It is one thing to write and another to publish your book and make it available to millions of people worldwide. But publishing a book has been never that easy. You have to look for a publisher and before that, you have to find someone to read and even edit your work before you look for a publisher. A guide to the central texts and problems in ancient Greek political thought from Homer through the Stoics and Epicureans. The title of this new book: "The Connected Home" reflects the move away from the idea that smart homes would alter the lives of those living in them by providing technologies to take over tasks that were previously the responsibility of the householder, such as managing entertainment, education – and even eating! Up until around 10 years ago this view was commonplace but time has shown that the technologies to support a smart home have not developed in such a way as to support this premise. Instead, what people do in their homes has moved the concept of a smart home into that of the 'connected home'. The rise of on-line games technologies, video connections via Skype, social networking, internet browsing etc are now an integral part of the home environment and have had a significant effect on the home. The contributors to this exciting new book consider and discuss the effects and ramifications of the connected home from a variety of viewpoints: an examination of the take-up of personal computers and the Internet in domestic situations; an analysis of the changing intersection of technology and human habits in the connected home; the impact of gaming, texting, e-book readers, tablets and other devices and their effect on the social conditions of a household; the relationship between digital messaging applications and real geography; and an overview of how sensing technologies for the smart home might evolve (lightweight medical technologies for example). The book culminates by addressing unfinished ambitions from the smart home agenda, the factors that have prevented their realisation, and addresses the need for extending research into the area. The Business of ePublishing 2015 Edition explains in thorough detail what professional publishers, designers, and traditional, independent, and hybrid authors need to know about the world and business of digital publishing in 2015 and beyond. How will human rights thinking be liberated from its doctrinal approach to ethics and legal justice? This book forges an alliance between cultural studies and human rights scholarships, to help us better understand the changing and complex political context that continuously shapes contemporary violence. To date, interdisciplinary dialogue or institutional collaboration remains rare across the two domains, resulting in critical interpretive work appearing too vacuous at times and institutional legal work often trapped in doctrinalism. Theology is seen to derive from a number of sources: the biblical language, biblical rhetoric and composition, academic disciplines other than philosophy, and above all a careful exegesis of the biblical text. The essay on Psalm 23 makes use of anthropology and human-development theory; the essay on Deuteronomy incorporates Wisdom themes; the essay called "Jeremiah and the Created Order" looks at ideas not only about God and creation but also about the seldom-considered idea of God and a return to chaos; the essay on the "Confessions of Jeremiah" examines, not words this extraordinary prophet was given by God to preach, but what he himself felt and experienced in the office to which he was called. Other essays argue that theology is rooted in biblical words--in and of themselves, and in context--and in rhetoric, where the latter must also include composition. One essay on "Biblical and Theological Themes" includes a translation into the African language of Lingala. A Wall Street Journal Bestseller In a world of unrelenting change and unprecedented challenges, we need organizations that are resilient and daring. Unfortunately, most organizations, overburdened by bureaucracy, are sluggish and timid. In the age of upheaval, top-down power structures and rule-choked management systems are a liability. They crush creativity and stifle initiative. As leaders, employees, investors, and citizens, we deserve better. We need organizations that are bold, entrepreneurial, and as nimble as change itself. Hence this book. In Humanocracy, Gary Hamel and Michele Zanini make a passionate, data-driven argument for excising bureaucracy and replacing it with something better. Drawing on more than a decade of research and packed with practical examples, Humanocracy lays out a detailed blueprint for creating organizations that are as inspired and ingenious as the human beings inside them. Critical building blocks include: Motivation: Rallying colleagues to the challenge of busting bureaucracy Models: Leveraging the experience of organizations that have profitably challenged the bureaucratic status quo Mindsets: Escaping the industrial age thinking that frustrates progress Mobilization: Activating a pro-change coalition to hack outmoded management systems and processes Migration: Embedding the principles of humanocracy—ownership, markets, meritocracy, community, openness, experimentation, and paradox—in your organization's DNA If you've finally run out of patience with bureaucratic bullshit . . . If you want . . . build an organization that can outrun change . . . If you're committed to giving every team member the chance to learn, grow, and contribute then this book's for you.
